ICY BOX **IB-M2HSF-703** Heat sink with fan for M.2 SSD

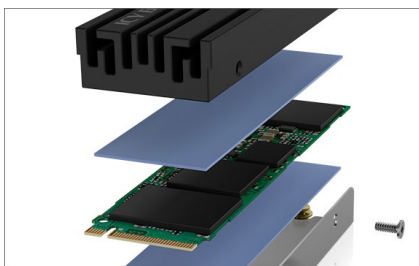

Thanks to the cooling fin

With its 8 cooling fins, which increase the surface area of the heat sink, the IB-M2HSF-703 can optimally dissipate the heat of the M.2 SSD to the environment.

Clever combination

Maximise the performance of your M.2 SSD without fear of overload. Thanks to the combination of a solid aluminium heat sink and a 20 mm fan, the IB-M2HSF-703 can achieve a reduction of the M.2 SSD temperature by up to 25%.

Thermal pad

A thermal pad serves - similar to thermal paste - to better dissipate the heat lost by electronic components and thus makes a significant contribution to heat dissipation.
