Iori Product Specifications

Top-Mount Fan

The Iori is an all-new, compact top-flow cooler. The layout of this structure makes it possible to not only cool the CPU, but at the same time makes sure that components like the chipsets and MOS-FETs on VR modules are actively cooled down as well. The compact dimensions of the Iori make it perfectly suitable for use in smaller cases or HTPCs.

New Generation Clip System

The mounting of the Iori is performed with a completely overhauled version of the proven push-pin system often applied with smaller sized CPU coolers for Intel, or simple mounting clips for AMD.

New 100 PWM Fan

Specially developed for the Iori, Scythe supplies a 100mm round-shaped PWM fan fitted with 92mm mounting holes. It is automatically controlled by the motherboard's PWM function, and adjusts the temperature to the CPU.
