## Easy Set Up

### Step 1. Download “Littlelf smart” APP.

|                                                                                     |                                                                                      |
|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
|  |  |
|                                                                                     |  |

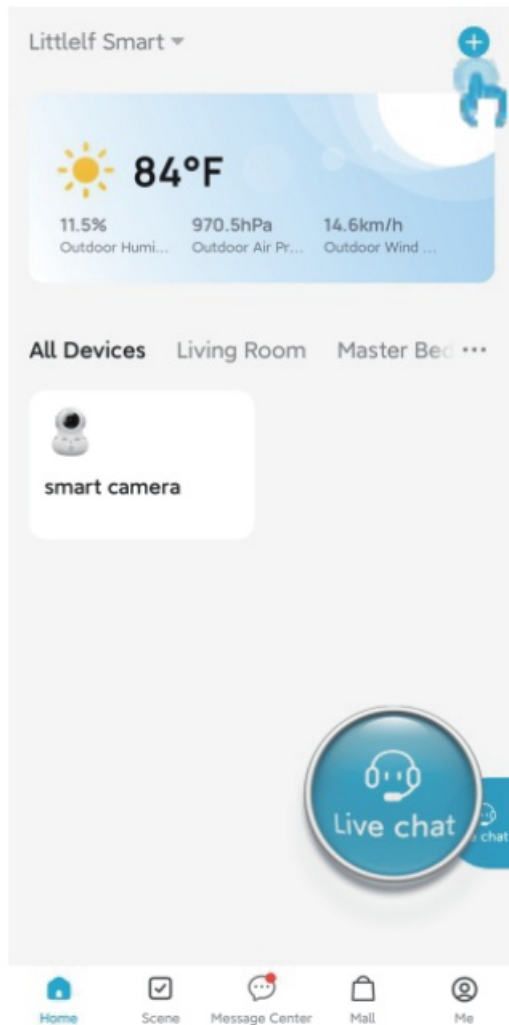

### Step 2. Enter Your Email to Register an Account on APP.

### Step 3. Connect your Camera to Network.

Follow the instructions on the app, until you hear the sound prompt, enjoy the Litokam Camera.

**Note:**

1. Please make sure your router network is 2.4GHz while you are connecting the Camera at first time.
2. Please make sure the WiFi passwords do not support special characters such as @, #, %, &.
