Highlights

Noise Cancelling Pro

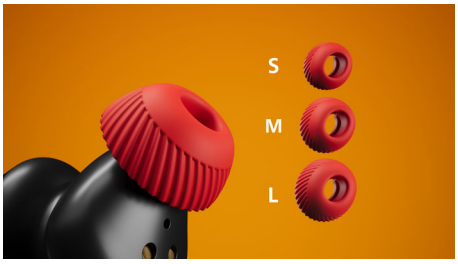

Busy gym? Windy park? Adaptive noise cancellation quickly reacts to your surroundings to suppress external noise, including wind, in real time. If your run takes you near busy roads, you can tap an earbud to activate Awareness Mode and let outside sounds in.

Clearer calls on the go

When you're on a call, a dedicated mic picks up the sound of your voice while an AI algorithm removes background noise from the world around you. The person you're speaking to will hear you, not the traffic or the chatter of people standing next to you!

Reliable in-ear fit

Doesn't matter how you move, these buds stay put. The silicone ear tips feature a textured grip pattern, which helps the earbuds stay in your ears and makes them easy to hold with sweaty hands. The surface of the earbuds is reflective, which can help with visibility at night.

Next-generation Bluetooth

These earbuds will work with devices that support Bluetooth LE Audio and the LC3 codec to give you a steadier connection and noticeably better sound. The sound won't dip if you're streaming music or taking calls in built-up areas, and there's virtually no lag if watching films or gaming.

IPX5 water protection

An IPX5 rating means that these headphones don't mind a drop of rain or a downpour, so they'll never give you an excuse to stay on the couch! If you get a sweat on in the gym, the headphones won't mind that either.

28 hours play time with case

Don't want to worry about daily charging? You get 7 hours of play time and an extra 21 hours from the small charging case. Pop the earbuds back in and they'll recharge fully in 2 hours. If you need a quick boost, just 5 minutes gives you an extra hour. The case can be charged via USB-C.

Philips sound signature

Go big on the tunes that get you going! You get detailed, energising sound with rich bass as the graphene-coated drivers reproduce every sparkling high and weighty low. Android or iOS, you'll enjoy all the immersion you need to keep your energy up.

Philips Headphones app

You can use the Philips Headphones app to customise noise cancelling, turn auto wind-noise reduction off and adjust the level of transparency when using Awareness Mode. An equalizer lets you fine-tune your sounds, and you can keep your headphone's software up to date via the app too.

Multipoint connectivity

Bluetooth multipoint lets you connect to two devices at once: great if you're streaming from a phone and getting training alerts from your smartwatch. Touch controls on the earbuds cover calls, music playback and more. Siri and the Google Assistant are both supported.
