UNLEASH YOUR
SPEED

POWERED BY
C27G4Z2

The C27G4Z2 offers competitive gaming performance on a 27" curved Full HD VA panel, delivering fast, smooth visuals with striking clarity. An overclocked 260Hz refresh rate and 1ms GtG response time ensure fluid motion and minimal blur, while low input lag keeps every action precise and responsive. HDR10 support enhances colour and contrast for more dynamic, lifelike images, and the height-adjustable stand provides ergonomic comfort during extended sessions.

- **1500R Curved**
- **260Hz (OC240Native)**
- **FHD Resolution**
- **Fast VA**
- **1ms Response time GTG - Grey-to-Grey**
- **Live the game at its best with HDR10**

1500R CURVED

Curved design wraps around you putting you at the center of the action and provides an immersive gaming experience.

260HZ (OC240NATIVE)

260Hz (OC,240Native) completely unleashes top end GPUs, bringing unprecedented fluidity to the picture on your screen. With every detail brought sharply into focus and every movement shown with crystal clarity, feel your reactions become one with the action and elevate your game.

FHD RESOLUTION

Want to watch a Blu-ray movie in full quality, enjoy games in high resolution or read crisp text in office applications? Thanks to its Full HD resolution of 1920 x 1080 pixels, this monitor lets you do just that. Whatever you are viewing, with Full HD it will be displayed in rich detail without requiring a high-end graphics card or consuming a lot of your system's resources.

FAST VA

Immerse yourself in a world of deeper blacks and striking contrast. Vivid, bright visuals bring your games to life like never before.

1MS RESPONSE TIME GTG - GREY-TO-GREY

GtG stands for Grey-To-Grey and represents how long it takes for one pixel to change between one gray level to the next. In gaming, every millisecond counts and can be the differentiator between hitting or missing a shot. Fast response time also eliminates ghosting and motion blur.

LIVE THE GAME AT ITS BEST WITH HDR10

HDR10 is here to enhance picture quality even further, improving the synchronization of your GPU or your console with the monitor. This creates a more realistic, immersive, and smooth gaming experience: You'll feel like stepping in the game, frame by frame.
