LOOP RECORDING

G-SENSOR

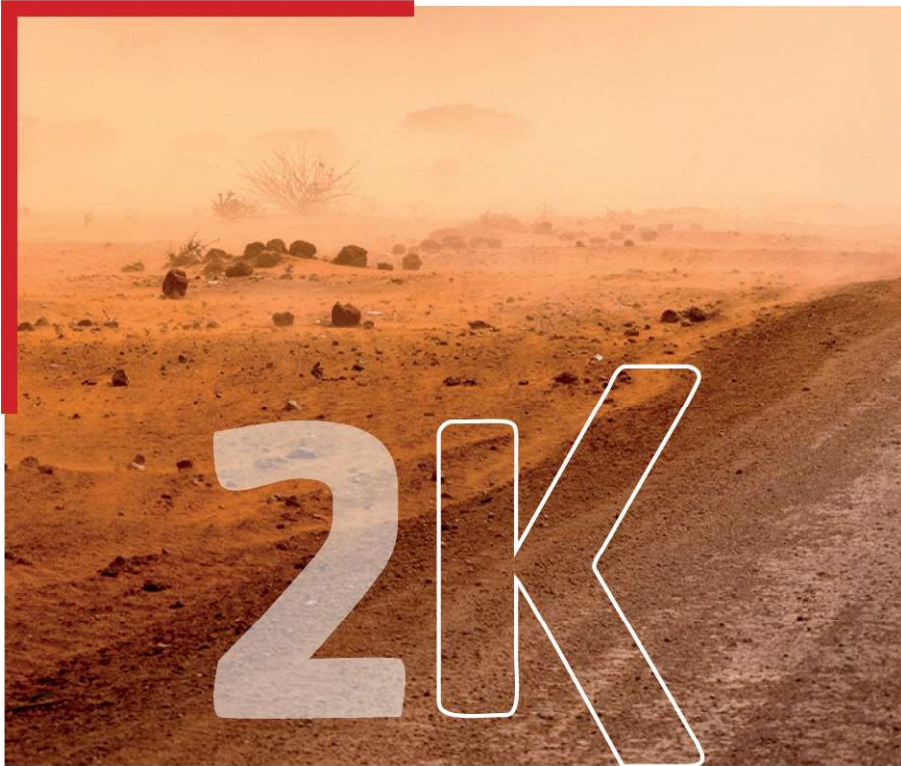

WIDE VIEW ANGLE

The Xblitz Black 4K dashcam records a 170-degree wide view, allowing you to see both lanes of the road, including the shoulder. You can easily see the licence plates of passing vehicles.

170°

GREAT IMAGE QUALITY

With the Xblitz Black 4K
videorecorder you get 4K high quality
images, so that no detail escapes
your attention.

GPS

MODULE

The satellite navigation module that the Xblitz Black 4K is equipped with allows you to locate the coordinates of your vehicle and record its current speed in the vides.

SONY STARVIS SENSOR

The Xblitz Black 4K is equipped with a bright lens and an advanced Sony sensor to ensure excellent recording quality - even after twilight.

LOOP RECORDING

The device records in a loop, which means that old files are automatically overwritten with new ones. So you don't have to manually erase data to free up disk space.

PARKING MODE

The Xblitz Black 4K will automatically start up and begin recording as soon as it detects a bump while the car is parked. With this solution, you can easily identify the perpetrator of a parking bump.

ACTIVE HOLDER

The active grip ensures that the energy source is always available. So you don't have to worry about suddenly losing video recording capability. The bracket ensures a stable position for the device and also makes it easy to mount and quickly release the camera.

Xblitz® AND... ON THE ROAD!

The Xblitz Black 4k is a guarantee of peace of mind and safety on long journeys. This model is not only sleek and modern, but also functional and user-friendly.

GPS

NIGHT VISION

We have taken care of the high quality of the recordings not only during the day, but also at night. The Xblitz Black 4K video recorder has an advanced sensor with "Night Vision" mode, which will allow you to successfully record nighttime trips as well.

MASZ
DOWÓD!

G- SENSOR

As standard, the video recorder records in a loop, but in the event of a sudden braking or collision, the files from the dangerous incident will be overwrite protected. This will give you evidence for your case.

MOTION DETECTOR

The Xblitz Black 4K car camera is equipped with a motion detector that will trigger the device whenever it detects movement around your vehicle. You can easily check if someone has been approaching your car while you are away.
