Description

The **Akyga® AK-MB-02 monitor mount** is the ideal solution for those who need additional working space and a better organised workstation. With the ability to mount **two monitors**, each with a diagonal of **15 to 32 inches**, it offers significantly more flexibility compared to single desk mounts. The arm is ideal for those working with multiple screens, providing excellent workstation organisation and allowing easy adjustment of the position of both monitors. What's more, thanks to the support of the **VESA** mounting standard, the mount ensures wide compatibility with most monitors available on the market.

VESA mount

The AK-MB-02 **desk mount for monitors** is mounted directly to the desk top, which guarantees the stability and safety of the mounted screens. The installation process is quick and hassle-free, thanks to the simple mounting system. In addition, the desk mount supports the VESA standard, which means that it can be used with monitors with mounting holes of **100x100 mm** or **75x75 mm**.

Functional monitor mount

The **monitor mount** offers versatility in adjusting the orientation of the screens while working. **The mount's height adjustment capability** allows the screens to be perfectly matched to the preferred height, which promotes working comfort and reduces neck and eye strain. The mount also allows for a **tilt angle adjustment** of +/-90 degrees and a 360-degree **rotation of the monitors**, allowing for a freely customisable view. In addition, the mount supports the **PIVOT** function, which allows you to easily change the screen orientation from landscape to portrait.

Uncompromising order

The monitor arm combines functionality with modern design. It is made from high-quality materials, ensuring durability and reliability. Its elegant design blends in perfectly with modern desks. **The cable management system** integrated into the bracket keeps your desk tidy, eliminating tangled cables and improving the aesthetics of your workspace.
