

Endorfy Fluctus 120 PWM ARGB (EY4A002)

Do you know that feeling when you walk into an air-conditioned room after an hour's walk in full sunlight? That's how your computer will feel (let's keep an open mind here) when you install the Endorfy Fluctus 120 PWM ARGB fan. It is small, but it is by no means inferior to its bigger competitors (especially that the ARGB backlighting makes it the real star of the evening). Its 12 cm of height is enough to cool your processor - it does the job even on densely finned radiators in liquid cooling systems as well as in chassis equipped with dust filters. It's also very easy to install even if it's your first serious DIY effort. We're talking about IT equipment, of course. Home renovations don't count 😊

See-you, not hear you!

The Fluctus 120 PWM ARGB is so quiet that the only thing you will hear when it runs is... your own work.

We are serious! We've done hours of 3D graphics rendering and video encoding, and even a break for a long raid with the guild crew - all of that without any monotonous background hum. It could get even quieter, but we'd have to turn off the instant messenger for that;)

What makes this possible are the wavy edges of its blades, which reduce the audibility of annoying noise (the psychoacoustic optimization of Fluctus fans is patent pending). We have this theory that if we made them large enough, another ice age would ensue - they handle keeping your computer cool with ease.

Do you know the game of freeze tag?

When someone tags you, you need to stand still until another player unfreezes you.

The Fluctus 120 PWM ARGB works on a similar principle - the difference is that it stops when the level of control signal is low (this is the so-called optional semi-passive mode). We've thrown in a PWM splitter, so you can effortlessly connect a second fan to it and control its rotational speed as well.

Anti-vibration rubber pads

If you spend every free moment at your computer, you know that demanding operations can sometimes add a massage function to your chassis. These slight vibrations can effectively throw you off your balance - especially when you've been staring at your monitor for hours and you need absolute focus.

That's why we've built rubber anti-vibration pads into the Fluctus frame, which isolate the fan on each axis. This prevents vibrations from being transferred to the chassis, so your hardware works quieter, and you can focus on what's the most important

Stay alpha RGB, baby

If you like hardware that attracts attention and looks out of this world, then you're going to love the Fluctus 120 PWM ARGB. Colored backlighting is a terrific thing if you like to sit at your computer in the dark or want your battle station to give your jealous buddies hypertension.

With ARGB illumination, you can match the appearance of the fan to your battle station. The backlight is compatible with popular motherboards and ARGB controllers (including Endorfy products), so you can easily synchronize them with your Fluctus.

The ARGB version works just as well as its non-backlit brother. They share the same design; we'd never sacrifice performance for a cool look.

~~Without extensions~~ With an extension cord

The Fluctus 120 PWM ARGB is a cooler you can install in minutes - even if you are assembling your computer for the first time. We've included an additional extension cord with the fan, so you can easily route the cable even in a large chassis. We've also added a step-by-step manual to guide you through the process. Without any extensions 😊

6-year warranty

We are confident about the quality of equipment bearing the Endorfy logo - especially since the Fluctus 120 PWM ARGB glides on a durable FDB bearing. That's why it comes with an extended, 6-year warranty that covers the entire cooling system (although you probably won't use it anyway).

Endorfy Fluctus 120 PWM ARGB – main features:

- Bright ARGB illumination
- High performance against flow restrictions
- Improved acoustic performance
- Extended fan speed range
- Long-life FDB bearing
- PWM control with automatic fan stop
- Integrated anti-vibration pads
- PWM signal splitter and 40 cm extension cable

Endorfy Fluctus 120 PWM ARGB – technical specifications:

- Product code: EY4A002
- EAN: 5903018665955
- Product type: PC fan
- Fan dimensions: 120×120×25 mm
- Fan bearing: FDB
- Fan speed: 250 (±100) – 1800 (±10%) rpm
- Control (speed): PWM
- Connector (fan): 4-pin (power, male and female)
- Voltage (fan): 12 V
- Current (fan, peak): 0.30 A
- Control (LED): ARGB
- Connector (LED): 3-pin (ARGB, male and female)
- Voltage (LED): 5 V
- Current (LED, peak): 0.30 A
- MTBF: 100 000 h
- Warranty: 72 months

Endorfy Fluctus 120 PWM ARGB – logistics data:

- Retail box dimensions: 145×32×131,5 mm
- Weight (net): 144 g
- Weight (gross): 209 g
- Master carton dimensions: 670×305×290 mm
- Master carton weight (gross): 17.60 kg
- Product quantity in master carton: 80 pcs

Set includes:

- 1× Fluctus 120 PWM ARGB fan
- 1× 40 cm PWM extender
- 4× Screw
- Safety instruction
