Description

The Akyga® AK-MB-10 TV bracket is a modern and robust solution that allows screens to be conveniently mounted on the wall. With its help, it is possible to suspend both small TVs with a diagonal of 37 inches and large TVs up to 70 inches. Thanks to this, the TV bracket is ideal for use in homes as well as offices and conference rooms. What's more, its well-thought-out design not only ensures stability, but also helps save space while taking care of the aesthetics of the space.

TV mounting standard — VESA

The AK-MB-10 **TV mount** supports the popular **VESA 600x400 mm standard**, which makes it compatible with many TV models available on the market. The simple assembly guarantees easy installation, allowing the screen to be fixed quickly and without problems.
The VESA mounting system is a popularly used standard that specifies the location of the mounting holes on the back of the screen. Thanks to this universal solution, TVs can be quickly and securely attached to the mounts.

TV bracket - safety and durability

The TV bracket is designed for screens weighing up **to 50 kg**. It provides a secure and stable fixing, even for larger screens. The robust design minimises the risk of damage to the TV, making it ideal for a variety of locations - from living rooms to public spaces.

Tilt and swivel TV adjustment

The TV wall mount **allows for a tilt angle adjustment** of +/- 20 degrees and a right/left rotation of +/- 45 degrees, allowing you to perfectly adjust the position of your TV screen to suit your individual needs. No matter where you are in the room, you can quickly adjust the position of your TV for a comfortable viewing environment, eliminating glare and improving visibility.
