StageDiver Wood-Design

high-glossy design meets real wood veneer

The StageDiver is the ultimate universal monitor from InEar. The design engineers from InEar created a monitor that fits in almost every ear and looks identical to a custom made system.

The base for the housing was developed by «overlapping» over 500 different scans from ear impressions. Several prototypes were manufactured in-house and tested on customers to find the perfect fit so the monitor will not move. At the end of the development cycle InEar had created an almost perfect to the anatomy of the ear universal monitor.

StageDiver-Serie

High-End-Monitoring

- ✓ Fits perfect in almost every ear
- ✓ Unlike other competitive standard lines, InEar StageDiver series looks just like the LivePro series (Custom made)
- ✓ Perfect sound quality achieved with high end drivers and tuned (diplexer) components
- ✓ Eliminates surrounding noise up to 26dB
- ✓ Exchangeable earwax filters We recommend to just order a filter set
- ✓ The cables used are meeting worldwide standards for InEar-monitors. All cables are exchangeable and there is a formable wire to keep the cable behind the ear

StageDiver 1

1-way system with impressive dynamics and linear reproduction across the entire frequency spectrum! Without embellishing the sound, the 1-way driver has sufficient resources to deliver a powerful bass.

Technical data

System	1-way system
Transmission range	approx. 40 Hz–17000 Hz
Output sound pressure	122 dB
Impedance	45 ohms
Cable length	140 cm / (55")

Standard set includes

- › SD-1 earphones
- › Ear tip set (each 1 pair XS, S, M and L)
- › Gold-plated adapter (3.5mm on a 6.3mm jack)
- › 3 cleaning cloths
- › Zipper etui

Optional extras

- › Cerumen filter set
- › Cleaning products
- › Spare-cable black, transparent

StageDiver 2

2-way system has perfectly tuned drivers for bass, middle and high tones. An absolute picture perfect sound is achieved by using high-end parts that gives an incredible dynamic full sounding bass.

Technical Data

System	2-way-system
Transmission range	approx. 20–18000 Hz
Output sound pressure	119 dB
Impedance	40 ohms
Cable lenght	140 cm / (55")

Standard set includes

- › SD-2 earphones
- › Ear tip set (each 1 pair XS, S, M and L)
- › Gold-plated adapter(3.5 mm on a 6.3 mm jack)
- › 3 cleaning cloths
- › InEar hardcase IE11

Optional extras

- › Cerumen filter set
- › Cleaning products
- › Additional cables

StageDiver 3

The 3-way system comes with three drivers per ear. The StageDiver 3 also has a bass boost that gives an extremely voluminous low-pitch auditory sound, balanced high defined middles and brilliant high tones The StageDiver 3 is especially recommended for fans of the bass and musicians out of the electronic sphere.

Technical Data

System	2-way-system (3 drivers)
Transmission range	approx. 20–18000 Hz
Output sound pressure	120 dB
Impedance	23 ohms
Cable lenght	140 cm / (55")

Standard set includes

- › SD-3 earphones
- › Ear tip set (each 1 pair XS, S, M and L)
- › Gold-plated adapter(3.5 mm on a 6.3 mm jack)
- › 3 cleaning cloths
- › InEar hardcase IE11

Optional extras

- › Cerumen filter set
- › Cleaning products
- › Additional cables

StageDiver-S Series – 1, 2 or 3 way-InEar-System

smaller housing – more users!

To fit the unique sound of the SD-3 technology into a smaller housing was an extreme challenge, and the quality of the music did not suffer, “reached the goal!”.

Just listen to the SD 3 and get amazed. Even younger ears will have an experience.

StageDiver-Series «Wood-Design»

Handmade with incredible sound quality!

When black is too boring ...
«high-glossy design meets real wood veneer». **Limited Edition** – Every StageDiver is becoming unique! Right at this moment, we are offering six vibrant wooden veneers.

Updates and variations in the
«Limited Edition» program can be seen at any time. Whoever wants to be up to date can get registered to receive any news at any time by mail.
