Easily charge and store groups of mobile devices. ALOGIC multi-port USB desktop charging stations provide flexible options for charging and storing 7 to 10 phone, PDA or tablet devices on a bench for convenient access. Soft touch fins help to organize the devices and protect them while being charged.

Charging Made Easy

These chargers provide flexibility to charge multiple devices of the same or different types and are best suited to small to medium sized devices such as phones and tablets.

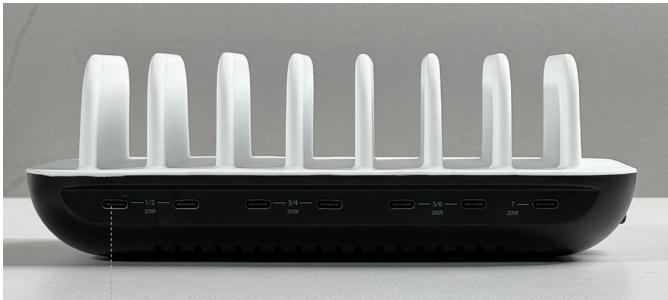

Intelligent charging outputs ensure that connected devices are charged as quickly and safely as possible. The chargers provide ample power to ensure that all devices can charge rapidly and at the same time.

Save Space and Reduce Clutter

ALOGIC desktop charging stations greatly simplify the charging of multiple devices, reducing the amount of space needed for the devices and the associated cable clutter.

The fins on top of the chargers provide an easy way to hold and protect devices while charging, while still being easy to place devices on charge or remove them from the charger for use.
