- N-key rollover support
- Anti-ghosting keys
- 1,000 Hz polling rate
- Operating life cycle of 50 million keystrokes
- Function keys with preset multimedia actions
- Detachable USB cable

TOP FEATURES

SUPERFLAT KEYS

Thanks to the particularly flat keys and the low height of the keyboard, the keyboard supports ergonomic use even without a palm rest.

ULTRA-COMPACT DESIGN

The frameless keyboard measures a compact 436 mm in length, 127 mm wide and only 23 mm in height when the feet are folded in, making it as flat as possible.

MECHANICAL

LOW-PROFILE SWITCHES (KAILH)

PURE TYPING PLEASURE FOR WRITERS

Many writers particularly do not want to miss out on its blue switches. With a distance to actuation point of only 1.5 mm, plus detectable click and switching point, fatigue-free usage with a pleasant typewriter atmosphere is guaranteed. The flat height of the keyboard supports ergonomic use even without a palm rest. Thanks to its long operating life cycle of at least 50 million keystrokes, tens of thousands of pages can be typed – even in darkened surroundings with its steplessly adjustable RGB illumination.

PURE ENJOYMENT FOR GAMERS

In addition to individual lighting in 16.8 million colors, gamers can look forward to a multitude of lighting effects and the option to save the individual lighting set of every single key into four profiles. All settings can be made quickly and easily without software. The PureWriter RGB naturally offers all the gaming essentials with n-key rollover, anti-ghosting keys and a polling rate of 1,000 Hz. With its pre-programmed multimedia keys, select and control the appropriate soundtrack at any time or surf the web comfortably. The red switches also have a distance to actuation point of 1.5 mm and, even with the slightest contact, will provide a valuable millisecond advantage during hectic game situations. Since they are completely feedbackless, you can easily sink into the game without any disruptions.

DETACHABLE USB CABLE

The PureWriter RGB has a USB cable with an ideal length of 150 cm for connection to conventional computers. A handy USB cable with a length of 50 cm is also included for conveniently connecting the keyboard to laptops. With an OTG adapter, the PureWriter RGB can also be used with Android devices, such as smartphones and tablets.
