ASUS Exclusive Innovations

■ **Game longer- guaranteed!**

We test each and every card to the max, starting with extensive checks for compatibility with the very latest chart-topping game titles. We also carry out reliability trials that include a 144-hour diskless-system test and 3DMark benchmarking under heavy loading for 15X longer than industry standards.

■ **Strong and Sturdy**

Cerberus GeForce GTX 1050 is engineered with a strong backplate to both protect the sensitive components on the rear side of the card and provide reinforcement for the circuit board. This backplate is accented with striking red lines — as an outward mark of Cerberus's role as a powerful guardian.
