Keep a cool head

If you want to store a large amount of data, a notebook usually has limited capacity. This is where the IB-2811 M-TB3 comes in and adds two M.2 slots to your Thunderbolt™ 3 capable notebook or computer. The modern Thunderbolt™ 3 Type-C™ connection offers transfer rates of up to 40 Gbit per second and the data flows in lightning speed. The case itself becomes a heat sink and thus offers optimal cooling so your drives will not become too hot headed.
