

SKILLER SGK50 S2 WOOD BAREBONE

Full layout, full freedom and a look that impresses: The Barebone version of the SKILLER SGK50 S2 Wood keyboard has the same technical advantages as the rest of the S2 series, including hot-swap compatibility and complete customization using VIA and QMK. Apart from its stylish real-wood housing, the Barebone version of the series is just the thing for the decisively creative user and comes completely without pre-installed switches and keycaps.

Features

■ MODERN AND STYLISH

For a unique and attention-seeking look, the SKILLER SGK50 S2 Wood Barebone combines a stylish wooden housing with modern design elements, such as RGB illumination and a chic USB-C coiled cable.

■ FOR THE CREATIVE AND THE DETERMINED

The SKILLER SGK50 S2 Wood Barebone will be the perfect choice for those who already have a good idea about the keycaps and switches they really want to have. This is because the keyboard is supplied without any pre-installed switches and keycaps, allowing for the complete personalization of the layout.

■ CUSTOMIZABLE TYPING EXPERIENCE

Do you prefer the personal touch? That's no problem! Switches of your choice – with either 3 or 5 pins – can easily be installed and used on the SKILLER SGK50 S2 Wood Barebone. Of course, the tools required for hot swapping are already included with the keyboard.

■ RICH KEYBOARD SOUND

To ensure that the keyboard sounds as good as it looks, we have installed a polycarbonate positioning plate and a silicone damping for a rich, deep sound.

■ FULL FORM FACTOR

The SKILLER SGK50 S2 Wood Barebone is the right choice for those who enjoy full functionality on a full keyboard layout. With 100 to 101 keys, the keyboard has a compact 3-block format that is 96 percent of a conventional keyboard.

■ FULL CUSTOMIZATION THANKS TO OPEN SOURCE

Instead of having to install software, the SKILLER SGK50 S2 Wood Barebone allows the RGB illumination and macros to be simply programmed on-the-fly. In addition, a complete range of customization is available through the compatibility with the open-source software VIA and QMK.
