

Design convector 2400 Watt

with Wifi

SHXPKV2400W

Highlights

- **Powerful**
With an output of 2400W, our convector offers efficient and fast room heating
- **Modern design**
characterised by a modern design with clear, hard edges that conveys stylish elegance
- **Placement options**
Choice of wall bracket or free-standing to flexibly adapt the convector to the needs of your room
- **Touch control**
The convector's touch control interface enables effortless operation
- **Smart home integration**
With the WIFI app control, your convector is in your hands anytime, anywhere.

This powerful heater not only offers outstanding performance, but also a variety of functions that maximise your comfort.

The modern design with a robust metal casing adds a touch of elegance and functionality to your room. The wall bracket allows for space-saving installation, while the free-standing design gives you flexibility in placement.

With 2 power levels (1200/2400 watts), you can adjust the heating intensity to suit your individual needs. The adjustable thermostat allows precise temperature adjustment in the range of 5°C to 45°C, so you can always enjoy the optimum heat.

The integrated 24-hour timer gives you full control over the convector's operating time. This not only saves energy, but is also extremely practical for pre-programming the heat supply.

Safety is paramount, which is why the convector is equipped with overheating protection, tilt protection and a child safety lock. Enjoy carefree heating, even in the presence of children.

The intuitive LED touch control enables effortless control directly on the device. For even more convenience, you can also control the convector via the Tuya app using Wi-Fi. The supplied remote control offers convenient operation from a distance.

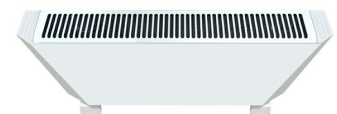

Experience cosy warmth, modern design and advanced technology all in one - our metal convector is the ideal solution for a comfortable indoor climate.
