Easy smart lighting

This little button makes a big impact. A single click controls your lights, while pressing and holding the button dims or brightens them. Better yet: your lights will turn on to our recommended colour and brightness based on the time of day.

Limitless possibilities

- Control lights with one click
- Get the right light at the right time
- Customised functionality
- Flexible, wireless mounting

PHILIPS

Highlights

Control lights with one click

A single click controls your smart lights —no smartphone needed. Use one press to turn your lights on and off or press and hold the button to dim and brighten them. Already set up to do exactly what you need, the Philips Hue Smart button is ready to use wherever you need it.

Get the right light at the right time

The Philips Hue Smart button is so smart that it knows exactly the best light to set the moment you press it. Depending on the time of day, your Smart button will tune your lights' colour and brightness to the best settings—inspired by the natural light outside. Need a jolt of energy in the morning or a relaxing atmosphere after a long day? Your Smart button knows just what light to set.

Customised functionality

Creating a personalised Philips Hue Smart button is easy in the Hue app. Change the Smart button's default settings to suit your needs, whether you want to set a customised or pre-set light scene, control all the lights in a room, or other custom actions.

Flexible, wireless mounting

With wireless technology, the Philips Hue Smart button installs in seconds anywhere in your home. Replace an existing light switch with the included mounting plate or use the mini-mount to place it on any surface. If you'd rather keep it portable, no problem: the Smart button is magnetic, so you can place it on any magnetic surface, such as the fridge.
