VC-01 Silver

Technical Data

Height	270 mm
Base diameter	40 mm
Material	Aluminium
Manufacturer number	VC-01 S
Code	4250140362100
Order number	600600210

Logistical Data

With the VC-01 Jonsbo presents a practical graphics card holder made of aluminum for PC housings.

Modern graphics cards are getting longer and heavier, with the result that the end tends to sag. To prevent the graphics cards from being damaged over time, Jonsbo offers the VC-01 Video Card Stand.

The VC-01 are made of high-grade aluminum. Two rubberized holding arms for supporting up to two graphics cards are included. The kit is modular and consists of two segments, two holding arms and the base. This makes the kit easy to use even in compact cases.

The VC-01 can be used without tools, the individual struts are simply screwed together, and holders are provided with thumb screws. A magnet in the floor ensures a safe stand in the case.
