SCMG-5100TUF MUGEN 5 TUF GAMING ALLIANCE

Product Specifications

TUF Gaming Alliance Design

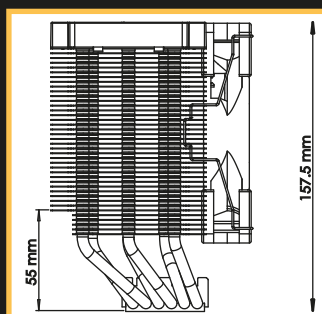

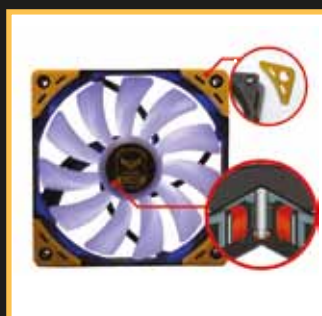

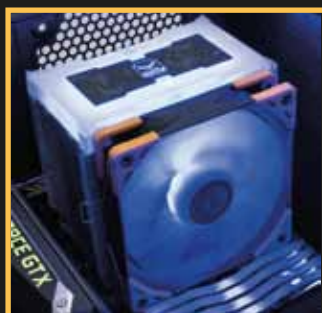

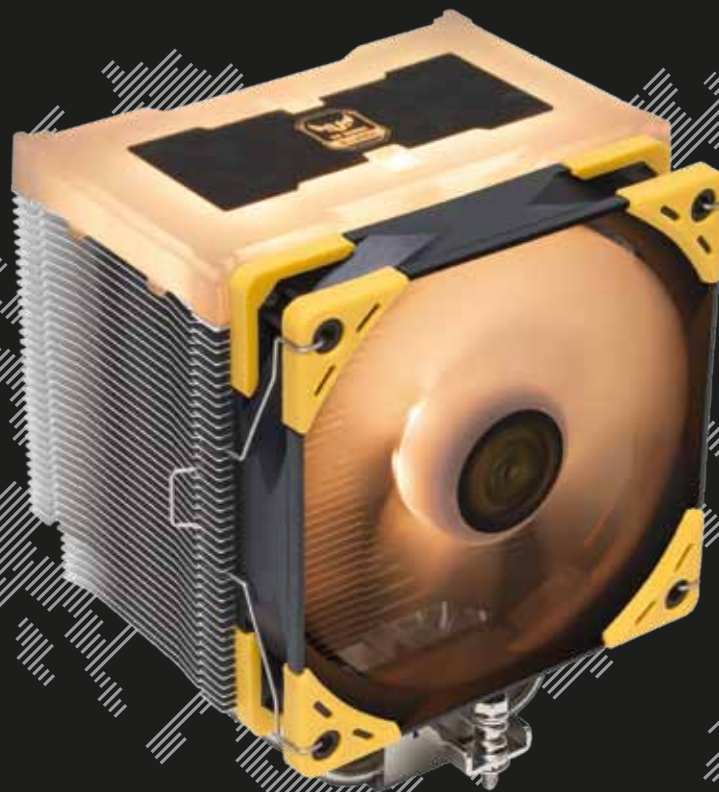

The Mugen 5 TUF Gaming Alliance CPU Cooler combines the excellent cooling performance of the regular Mugen 5 with the appealing design of Asus' TUF Gaming Alliance series. RGB lighting, yellow design elements, as well as the recurring TUF logo on the distinctive top plate and fan set visual accents that can be found on all Gaming Alliance products. The RGB LEDs can be managed via Asus Aura Sync or any other comparable 4 pin / 12V RGB controller.

Kaze Flex 120 RGB LED PWM Fan

The Kaze Flex 120 RGB PWM Fan features a self-contained liquid bearing (Sealed Precision FDB) which reduces friction and wear to a minimum, resulting in an average lifespan of 120 000 hours. Colored rubber pads mounted in the fan frame have a decoupling effect and prevent the transfer of vibrations. Eight RGB LEDs arranged around the fan-motor produce a uniform and powerful illumination of the translucent fan blades.

Asymmetrical Design / H.P.M.S. III

The heatpipes of the Mugen 5 TUF Gaming Alliance CPU-Cooler are gently sloped backwards so that the radiator is not centered directly above the baseplate, but slightly offset. This asymmetric design allows unrestricted usage of the memory banks. For easy and secure mounting, the Mugen 5 TUF CPU Cooler takes advantage of the proven and user-friendly H.P.M.S. III system. A preassembled mounting bar simplifies the installation process, while springloaded screws prevent uneven pressure distribution.
