for comfortable use
- **2 fan motors**
for powerful air circulation
- **LED mood light**
for a pleasant atmosphere in the room
- **Adjustable thermostat**
from 20°C to 40°C

PTC tower fan heater with ECO mode, 2000 watts

Equipped with a high-quality ceramic heating element, this tower fan heater provides efficient heat generation for any room.

Thanks to its three power levels (fan/1000W/2000W), you have full control over your heating options. The ECO mode ensures energy-saving operation, while the 12-hour timer and oscillation function ensure maximum comfort.

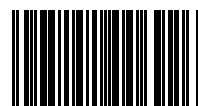

The LED display and touch control panel make control child's play, and two fan motors circulate the air evenly so you can feel completely comfortable.

Safety and atmosphere are taken care of: our tower fan heater has overheating protection and an LED mood light that creates a pleasant atmosphere in the room. Thanks to its fast heat-up time of just 3 seconds and an adjustable thermostat (20-40°C), you can achieve and maintain the desired heat in no time at all. The remote control gives you full control without having to get up from the sofa.
