

Acer ES Series 1 Advance

Fun & Modern Commuting

It is easy carry and light weight eScooter at just 11kg that you could easily shuttle in your daily life. Equipped with nice folding mechanism, featuring a user-friendly display, and multiple speeds. Bring more colors and possibilities (depending on country).

Go Anywhere With The Powerful Motor

The 5Ah battery & 36V/250W hub motor dependably propels commuters to their destination whether the road is flat or inclined. By reaching up to 23km distance only with one charge we assure you will scroll the streets easily and in a fun environmentally friendly way.

3 Speed Modes

Three speeds make it easy to switch between casual riding at 6 km/h, commuting at 10 km/h, or cruising at 20 or 25 km/h in case you are in a rush for school, work or meeting your friends.

Comfortable Ride With Light Weight

The function of front suspension is to reduce the bumpy feeling while riding on road. Make your riding experience smooth and sound. With only 11kg, you could carry it to any places you want to go. Nice folding mechanism ensure that you could store easily.

Specifications
