

EB-725Wi

Interactive agile display that creates an impact in any workspace. Focused on user needs and connecting people in or out of the workplace.

Transform any workspace with this flexible and scalable display that increases collaboration, productivity as well as delivering sustainability. Regardless of angles or room layout, every person enjoys uninterrupted, immersive viewing, with space maximised and social distancing made possible, without the unnecessary cost of larger fixed size screens.

Flexibility is paramount with the EB-725Wi, with bright, large scalable display options up to 100". Unlike flat-panel equivalents, there are no shadows, glare or blind spots, and the 4,000lm high-brightness laser light source can work when ambient lighting is also high. Multi-screen interactivity makes collaboration easy and intuitive, while a split-screen feature can show up to four inputs in one large display at HD resolution.

The viewing experience is more immersive, with multiple connectivity options enhancing exceptional image and sound quality. For the ultimate in engagement, wireless connectivity, including Screen Mirroring via Miracast, allows everyone to share content from their tablets, mobiles or laptops.

Users can annotate content with pen and (optional) finger touch, alongside advanced whiteboard options. The EB-725Wi also supports additional collaboration and productivity tools, including print, save and email, and multiple inputs in one display, including video conferencing, visualiser cameras and presentation technology.

Unlike flat panels displays, the EB-725Wi provides multiple display sizes and formats for one fixed cost. It also offers flexible mounting options, it's faster and easier to deploy, it's more comfortable to view, it's more sustainable and it provides more hygienic workspaces when used with antibacterial whiteboards - free from finger marks.
