

CLUB ONE

Wireless Over-Ear True Adaptive Noise Cancelling Headphones

Legendary JBL Pro Sound that brings premier performance to the everyday.

Tune in and hear what the world's top musicians hear. JBL CLUB ONE headphones with Legendary JBL Pro Sound immerse you in your playlist and keep you in the moment with True Adaptive Noise Cancelling. These pro-inspired, Hi-Res certified headphones deliver audio tailor-made for your ears, thanks to EQ personalization and the My JBL Headphones App. High quality materials and premium design details like durable metal hinges, a leather headband and comfortable, cushioned, over-earcups, mean you will never want to take them off. Listen like a pro anywhere.

- ▶ Listen like your favorite DJs
- ▶ Hear exactly what you want with Ambient Aware and TalkThru
- ▶ Keep the music going for 45 hours
- ▶ A treat for your ears
- ▶ As adventurous as you are

Features and Benefits

Pro-quality sound

You've never heard your favorite songs like this before. With Hi-Res audio, Legendary JBL Pro Sound, and a 40mm custom orange graphene driver, you'll get a wide range of detail and clarity that makes every note sing.

Tune it all out

Zone out of the world around you and into your music. JBL CLUB ONE headphones feature True Adaptive Noise Cancelling that responds to the environment and its changes in real time and adapts to you by compensating for sound leakage caused by factors like hair, eyeglasses, and head movement. And the SilentNow feature allows to keep True Adaptive Noise Cancelling on without activating Bluetooth music, so you can stay in the zone.

Powerful audio, your way

Go ahead, be picky. The JBL CLUB ONE headphones have dual aux input, so you can plug in on either side. Either way, you'll get a 3,500mW max input and resistance to power surges.

Get help from the Google Assistant & Amazon Alexa

Send a text message, tune into your favorite playlist, or find out if it's going to rain later — without picking up your phone. Choose the Google Assistant or Amazon Alexa on the My JBL Headphones app, and your Voice Assistant will take it from there with a simple tap of the left earcup.

Perfect calls with dual-mic technology

No more searching for peace and quiet to take a call. The dual-mic technology on the JBL CLUB ONE cancels out ambient noise when you are on a call, so you can make calls anywhere. From wire-free music, seamlessly connected thanks to Bluetooth 5.0, to hands-free calls, they keep up while you keep moving.

Listen like your favorite DJs

Some of the world's best DJs helped define the JBL CLUB sound. Simply select your favorite DJ through the STAGE+ function in the My JBL Headphones App. JBL CLUB ONE headphones will automatically calibrate the DJ's EQ so you hear every beat just like musicians do.

Hear exactly what you want with Ambient Aware and TalkThru

Stay aware while staying tuned into the music. A quick press of the Smart Ambient button activates the Ambient Aware function to amplify ambient sound while keeping you listening to your playlist. Meanwhile, the TalkThru mode drops the music level down and amplifies the voices around you, so you can carry on a conversation without taking off your headphones.

Keep the music going for 45 hours

Stay focused on your music, not your battery life. Enjoy 45 hours of Bluetooth connectivity before you need to recharge, so you can tune in from day to night and back again.

A treat for your ears

Your ears won't need a break from JBL CLUB ONE headphones. The cushioned, oval, over-earcups keep you comfortable from song to song, playlist to playlist. Made from high quality materials, they feature premium, stylish design details like durable metal hinges, accent bezel and a leather headband.

As adventurous as you are

Never travel without your favorite headphones again. JBL CLUB ONE headphones are ball foldable, durable and come with a flight adapter. Throw them into the protective case and go — they are up for anything you are.
