Mounting Screws, F.M.S.B.4 Back-Plate, Metal Assembly Clips, Rubber, Pair of Fan Clips, Thermal Grease, Installation Guide

## Big Shuriken 2 Product Specifications

### Improved Cooling Performance

Compared with its predecessor model the **Big Shuriken 2** is equipped with an additional heatpipe as well as an additional row of fins. By these improvements combined with a **2,000 rpm Slip Stream 120 Slim Series fan**, higher cooling efficiency could be achieved. By applying the orthodox method of pointing the airflow of the fan towards the motherboard, chipsets and MOS-FETs on VR modules can be cooled simultaneously.

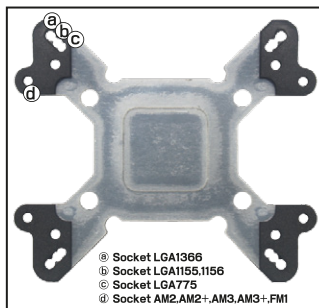

### New Slip Stream 120 Slim PWM Fan

The **Big Shuriken 2** is equipped with a new **2,000 rpm version of Slip Stream 120 Slim PWM fan** with small motor hub for better airflow. The fan can be replaced by general 120 mm fans with open corners for screw holes.

### Higher Compatibility

One of the main characteristics of the **Big Shuriken 2** is its outstanding compatibility. Only 58 mm in height it is versatile for all use and a perfect solution for low Profile PC chassis. In addition, the new **F.M.S.B. 4 (Flip Mount Super Back-Plate 4)** mounting system provides high compatibility with new generation chipset motherboards.
