- 5 individually programmable lighting profiles
- N-key rollover support
- Anti-ghosting keys
- 1,000 Hz polling rate
- Operating life cycle of 50 million keystrokes
- Detachable USB cable

TOP FEATURES

SUPERFLAT KEYS

Thanks to the particularly flat keys and the low height of the keyboard, the keyboard supports ergonomic use even without a palm rest.

ULTRA-COMPACT DESIGN

The frameless keyboard measures a compact 436 mm in length, 127 mm wide and only 23 mm in height when the feet are folded-in, making it as flat as possible.

MECHANICAL

LOW-PROFILE SWITCHES (KAILH)

PURE TYPING PLEASURE FOR WRITERS

Many writers particularly do not want to miss out on its blue switches. With a distance to actuation point of only 1.5 mm, plus detectable click and switching point, fatigue-free usage with a pleasant typewriter atmosphere is guaranteed. The flat height of the keyboard supports ergonomic use even without a palm rest. Thanks to its long operating life cycle of at least 50 million keystrokes, tens of thousands of pages can be typed – and even in darkened surroundings by means of its infinitely adjustable, neutral blue LED lighting.

PURE ENJOYMENT FOR GAMERS

Gamers can look forward to the multitude of lighting effects and the option to save the individual lighting set of every single key into five profiles. The PureWriter naturally offers all the gaming essentials with n-key rollover, anti-ghosting keys and a polling rate of 1,000 Hz. Select and control the appropriate soundtrack at any time via the four pre-programmed multimedia keys. The red switches also has a distance to actuation point of 1.5 mm and, even with the slightest contact, will provide a valuable millisecond advantage during hectic game situations. Since they are completely feedbackless, you can easily sink into the game without any disruptions.

DETACHABLE USB CABLE

The PureWriter has a USB cable with an ideal length of 150 cm for connection to conventional computers. A handy USB cable with a length of 50 cm is also included, which is ideal for connecting the keyboard to laptops for more clarity. With an OTG adapter, the PureWriter can also be used with Android devices, such as smartphones and tablets.
