

SKILLER SGK50 S4 GEN2 WOOD BAREBONE

The Barebone version of the SKILLER SGK50 S4 Gen2 Wood has the same technical advantages as the rest of the S4 series, including hot-swap switches and keycaps, as well as full customization possibilities using VIA and QMK. And in addition to the stylish real wood of the Wood series, the Barebone version is aimed at full creativity and comes completely without any pre-installed switches and keycaps.

Features

- MODERN AND STYLISH**
 For a unique and attention-seeking look, the SKILLER SGK50 S4 Gen2 Wood Barebone combines a stylish wooden housing with modern design elements, such as RGB illumination and a chic USB-C coiled cable.
- FOR THE CREATIVE AND THE DETERMINED**
 The SKILLER SGK50 S4 Gen2 Wood Barebone will be the perfect choice for those who already have a good idea about the keycaps and switches they really want to have. This is because the keyboard is supplied without any pre-installed switches and keycaps, allowing for the complete personalization of the layout.
- CUSTOMIZABLE TYPING EXPERIENCE**
 Do you prefer the personal touch? That's no problem! Switches of your choice – with either 3 or 5 pins – can easily be installed and used on the SKILLER SGK50 S4 Gen2 Wood Barebone. Of course, the tools required for hot swapping are already included with the keyboard.
- RICH KEYBOARD SOUND**
 To ensure that the keyboard sounds as good as it looks, we have installed a polycarbonate positioning plate and a silicone damping for a rich, deep sound.
- COMPACT FORM FACTOR**
 The SKILLER SGK50 S4 Gen2 Wood Barebone catches the eye with a compact form factor that is 60 percent of a full 3-block keyboard. Nevertheless, thanks to the double assignment of keys for important commands, a layout with full functionality can be relied on.
- FULL CUSTOMIZATION THANKS TO OPEN SOURCE**
 Instead of having to install software, the SKILLER SGK50 S4 Gen2 Wood Barebone allows the RGB illumination and macros to be simply programmed on-the-fly. In addition, a complete range of customization is available through the compatibility with the open-source software VIA and QMK.
