

Product name: ENDORFY Solum Voice
Product code: EY1B014

The king of tiny microphones returns, this time on an adjustable arm. Optimized for gaming, voice chats and streaming services, Solum Voice will provide you with comfort while talking, and pick up your every word perfectly while doing so.

- High-quality recorded sound – the microphone picks up detailed sound, providing great quality of chats, podcasts and recordings. This is provided by a great synergy of high-quality elements within it.
- Mic on an arm – Solum Voice is a small microphone with an original design. It's accompanied by a slim, regulated arm that takes up very little space on your desk.
- Made for talking – thanks to its cardioid directional pattern, Solum Voice precisely picks up the voice in front of it. With streams and podcasts in mind, it's also provided with a jack audio output that gives you direct monitoring of the recorded sound.
- Signal control – the gain knob lets you set the microphone's sensitivity to make your voice clear. On the top of Solum Voice you'll find a touch button that lets you mute the sound discreetly while talking or recording.
- RGB lighting – a subtle RGB backlight ring surrounds the gain knob. To change its hue, click the volume knob once or more, until you find the color of your choice. Press and hold for a moment to turn the light off completely.
- Plug & play – Solum Voice doesn't require any software and works just after you plug it in. You can connect it to a PC, PlayStation or a smartphone with a USB-C port and OTG function available.

High quality sound input

The Solum Voice microphone picks up detailed sound while chatting, podcasting or recording voice lines. We achieved this with thorough, meticulous testing and combining high-quality components.

Tiny mic on an arm

Solum Voice is a tiny microphone with an original design that will look good both at a home gaming station and at a minimalistic recording space. Mount it on the included adjustable arm (devoid of extra springs and keys) and enjoy the comfort of communication even at a small desk.

Cardioid mode

Solum Voice works in cardioid mode – it picks up sound in front of the microphone and lets you ignore the background noise behind it. With streams and podcasts in mind, it's suited with a jack monitoring output that lets you hear the recorded audio directly.

Control the signal

In the front of Solum Voice there's a GAIN knob that lets you control its sensitivity and make your voice as clear as possible. Also, the upper part of the microphone has a touch-activated mute button, that will let you discretely cut out sound input while talking or recording.

The colors you like

The GAIN knob is surrounded with a subtle RGB backlight, allowing you to tweak it to suit your station, or your mood. To change its color, click the knob once or more to switch to a desired hue. Click and hold it for longer to turn off the backlight completely.

Plug & play

Solum Voice doesn't need any additional software and works straight away after you plug it in. You can connect it to your PC, PlayStation console or a smartphone with a USB-C port and OTG function.

ENDORFY Solum Voice – main features:

- Small size
- Regulated arm included
- RGB lighting
- Jack audio output
- Mute button
- Gain control
