RM600 & RM61-312

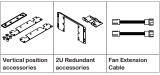

User manual www.silverstonetek.com

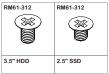

Accessories Content

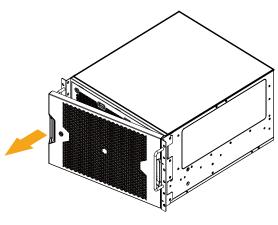

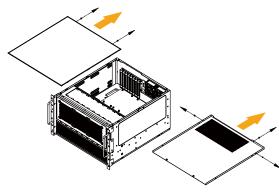

Installation Steps

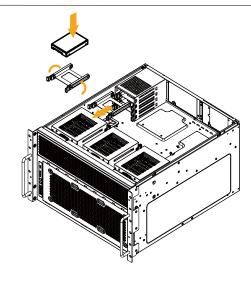

1. Press down on the front panel switch to remove the front panel

2. Remove both top and bottom panels

3. Remove the 2.5" SSD tray, and gently flex the tray to facilitate the installation of the 2.5" SSD

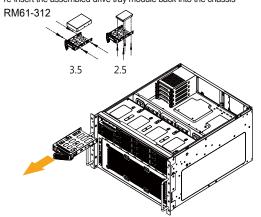

4. Install the 3.5" HDD in a similar manner. The 3.5" HDD can be inserted into the hard drive cage in either direction

RM600

5.External 2.5"/3.5" drive installation

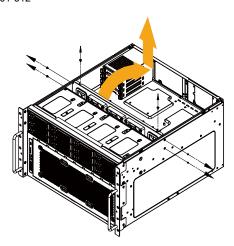

1. Pull the tray out of the chassis

2. Install the drive into the drive tray, secure it with screws, and then re-insert the assembled drive tray module back into the chassis

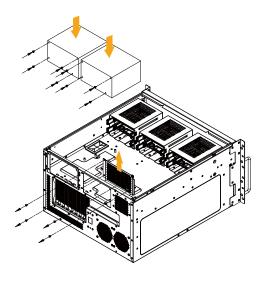

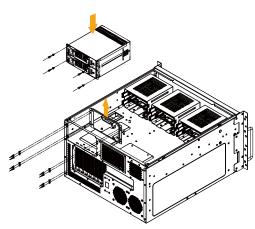

6. To facilitate a simple connection of the hard drive backplane cables, remove the fan bracket by loosening the screws that secure the backplane to the chassis

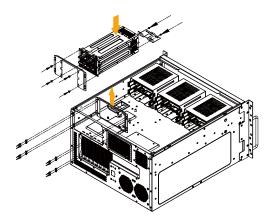

RM61-312

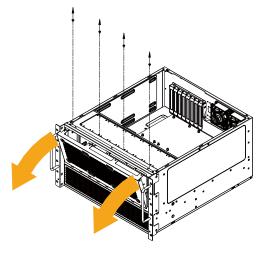

- 1. If installing dual ATX PSUs, please remove the ventilation cover beforehand
- 2. If installing a Mini Redundant PSU, please remove the ATX PSU bracket first
- 3. If installing a 2U Redundant PSU, also ensure to remove the ATX PSU bracket first
- 1. Remove the front 360mm radiator bracket

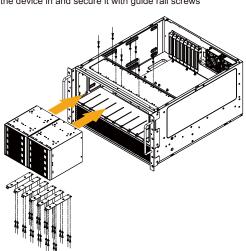

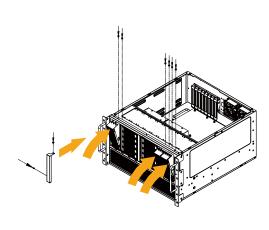

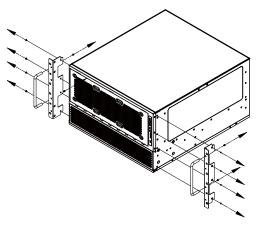

2. Attach the 5.25 guide rail to the 5.25" device, then slide the device in and secure it with guide rail screws

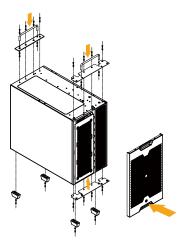

3. Install the 5.25" bezel, if 5.25" device mounts are unallocated, you can replace the 5.25" bezel with 5.25" ventilation panel to increase intake airflow

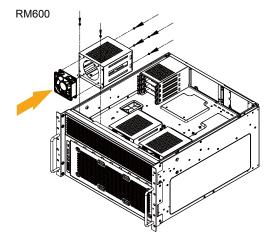

- 9. Vertical orientation installation
- 1. Remove L-shaped brackets and handle bar on both sides 2. Install handle bar onto the flat bracket and case feet

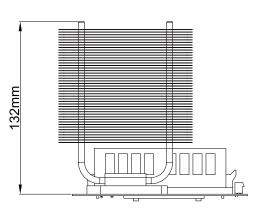

Optional Installation

1. Optional 3.5" HDD cooling fan assembly

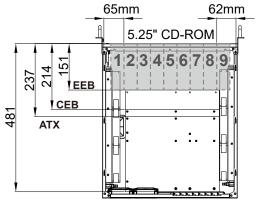

Component Limitations

1. CPU cooler height limitation with expansion card retainer is 132mm, and 150mm without

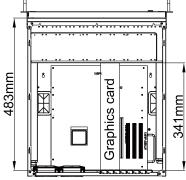

2. The radiators on both sides of the chassis will each occupy one 5.25" slot, as illustrated. The allowable total thickness of the radiators plus fan is depicted in the

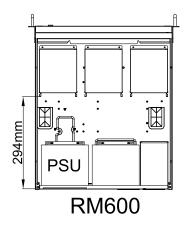

The combined length of 5.25" devices and motherboard equals to 481mm, the length of 5.25" devices allowed by various motherboard form factor is as shown.

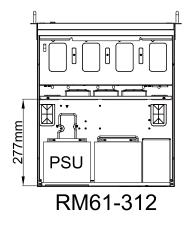

3. The maximum length allowed for the graphics card is 341mm. When combined with the 5.25" device, the total length extends to 483mm

4. The PSU has a maximum depth limitation of 294mm The maximum depth limitation for the PSU in RM61-312 is 277mm.
