

# Alpha 330

- 3 x Tempered glass panels
- 3 x Pre-installed dust filter
- 1 x Pre-installed fan brackets

**Fits extended ATX motherboards with up to 8 expansion slots**

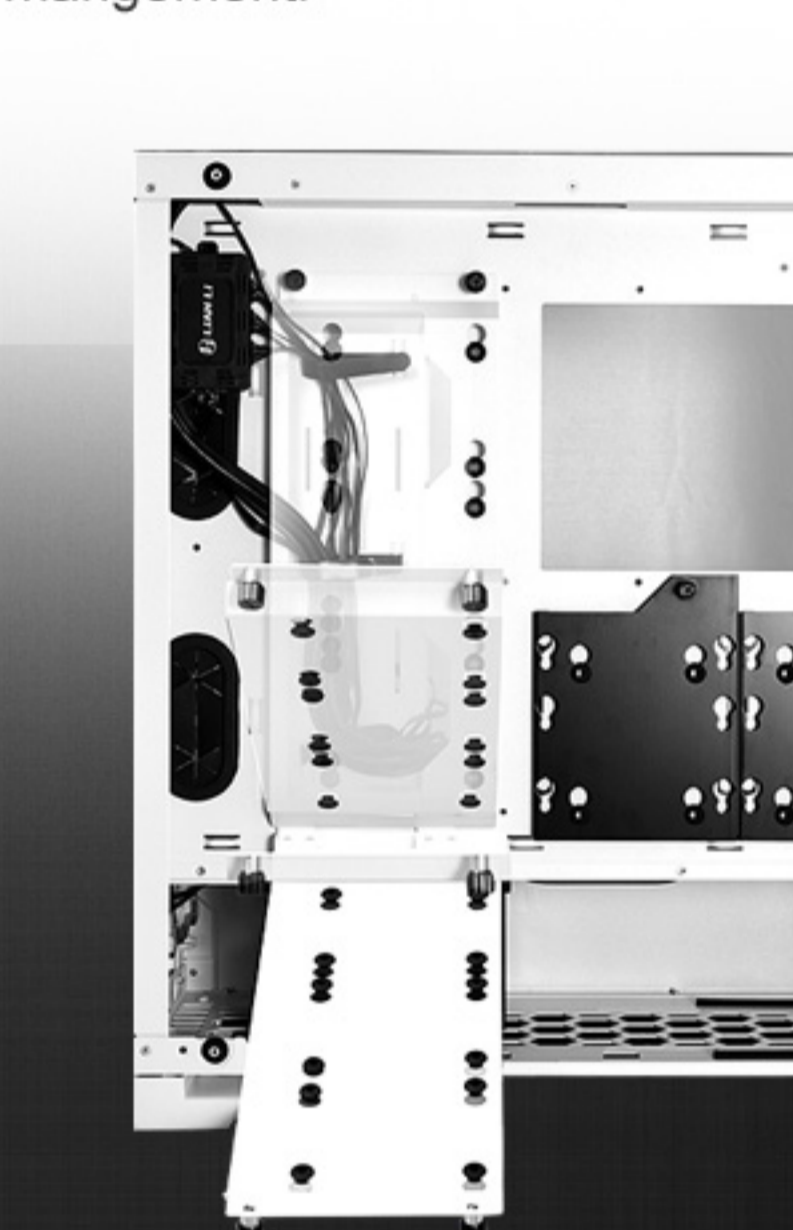

## For the cleanest builds

**Cable ties**  
Lose the unnecessary cable ties. The Alpha series uses an all tool-less design for easy cable management.

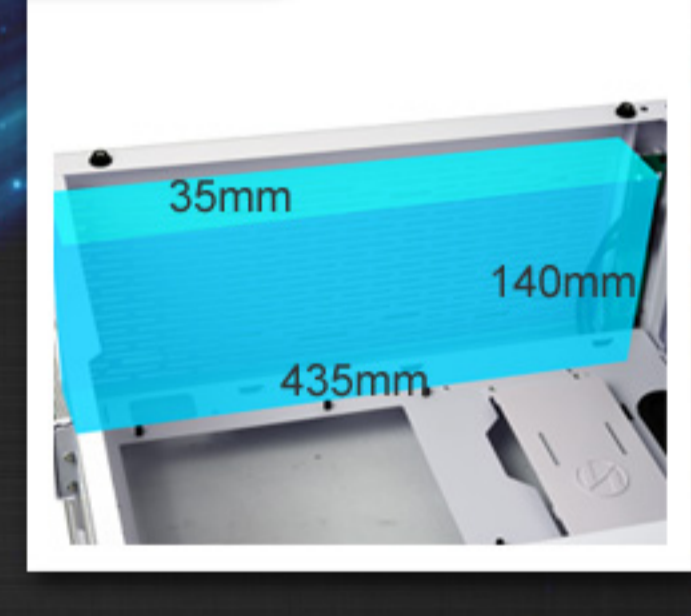

**Darkened tempered glass**  
The left tempered glass panel features two levels of transpance. This hides the cables in the PSU shroud area, and maintains that classy tempered glass look.

**Cable management**  
with tempered glass all-around, hiding cables is essential. The cable shroud behind the motherboard tray is spacious enough to hide all the cables in your build, and then some! Clean is the new standards.

## Water-cooling Ready

Pump and reservoir mount

Easy fan and radiator installation with special bracket
