# Xenon Flash Light (red)

Art. no. SG1670

- Including adapter and surface mounting
- High flash power
- Can also be mounted on SG1660
- Splashproof
- Protection class: IP54

You can install the Xenon flashing light inside and outside your building. The optical signalling device is a crucial link in a fully functioning alarm chain. At the start of the chain is a detector. In the event of an alarm, the colored Xenon flashing light can be seen over a large distance and flashes at 70 times a minute. The robust plastic housing (IP 54) of the signalling device offers protection against the environmental influences. The flashing light is supplied externally with 12V operating voltage. You can choose between three difference light colors, according to your requirements: red (SG1670), yellow (SG1675) and blue (SG1680).

**Technical Data:**

| | |
|---|---|
| Dimensions | (WxHxD) 175x110x75 mm |
| Flashing frequency | 1,17 Hz |
| Width | 175 mm |
| Housing material | ABS |
| Height | 110 mm |
| Length | 75 mm |
| Power consumption | 4,2 W |
| Luminous color | Red |
| Illuminant | Xenon |

| | |
|---|---|
| Max. operating temperature | 55 °C |
| Min. operating temperature | -25 °C |
| Installation location | Indoors and protected outdoor areas |
| Net weight | 0,15 kg |
| IP protection class | 54 |
| DC voltage supply | 12 V |
| Power consumption | 350 mA |
