

Endorfy GEM Onyx White (EY6A012)

When you buy equipment, sometimes you have to choose between a unique design and good parameters. Luckily, the GEM Onyx White has both.

It's a lightweight (67 g), bright and eye-catching mouse with an ARGB backlight and PTFE feet. Inside of the GEM, we hid the sensitive (up to 8000 DPI) PixArt PMW3325 sensor, which stands behind the instant reaction times of your commands.

Inside of the GEM housing, we also enclosed fast and durable Kailh GM 4.0 microswitches. They're small, but they process every click faster than you can say, "Wow!". Seriously — we tested it a few times.

Looks like mouse, but it's Onyx (White)

We designed the GEM Onyx White with the white variety of onyx in mind. It's a unique mineral that looks like marble but is more resistant. Our mouse is precisely the same — durable and so beautiful that it could compete in a beauty pageant for mice.

If someone organized one, just let us know.

Meet PixArt PMW3325

Work (and entertainment) is like real life — there's no time for lag. When you do everything at 100%, you need hardware that keeps up with you. That's why we made sure that the GEM Onyx White responds instantly to your every command.

The heart of the GEM Onyx White is the battle-proven PixArt PMW3325 sensor. It's freakishly precise across the board, all the way up to its maximum sensitivity of 8000 DPI. You can slide the mouse at a speed of 2.54 m/s, and it'll perfectly register your every maneuver.

It's a ~~hard~~ knock an easy life (with GEM Onyx White)

Some will probably say that GEM Onyx White weighs a little more because of its construction... But the truth is that at 67 g, it glides across the mousepad as fast as your neighbor runs up to the window when s/he hears noise on the street.

The GEM is equipped with slick PTFE that give it minimal resistance. This solution works perfectly with all mousepads — including everything from standard to even "control" and "speed" types.

Kailh GM 4.0 microswitches

Remember when we said that the GEM Onyx White is stronger than marble? We've tested it by hitting buttons for several hours and we can confirm that it's unbreakable. It beat even the most determined clickers — and we respect that.

Kailh GM 4.0 microswitches are ultra-fast and ultra-durable. They process every click in the fraction of a second, and their lifetime is estimated at 60 m clicks.

We have ARGB and won't hesitate to use it

If you're hunting for great-looking equipment that can instantly spice up your desk, then we've good news– your quest is complete. GEM Onyx White features an ARGB backlight and won't hesitate to add some moody ambiance to your war room.

With the GEM Onyx White you can backlight the Endorfy logo, the scroll wheel, and even the strip around the back of the case. Pick your own color or use one of the predefined effects – you can quickly change the whole configuration using the dedicated software.

Long and soft

An unwieldy cable tugging at your mouse in the middle of a scrim is every technology hero's worst nightmare. We've cried over spilt milk [cappuccino](#) countless times, but you don't have to anymore. GEM's long and soft cable is our new MVP.

Our "paracord" cable is more flexible than you'd expect. Its outer sheath of woven fiber has one job only — to protect the cable from damage. It's soft and light like your childhood teddy bear, so it won't interfere with your work. Additionally, it's 1.8 meters long — plenty for the GEM Onyx White to slide freely across the mousepad.

Live [Click](#) as you like

With GEM Onyx White you [live click](#) as you like. Thanks to the dedicated software, you have full control over the mouse and all its perks. Make your own rules — change its sensitivity, customize the ARGB backlight, and record macros.

Endorfy GEM Onyx White – main features:

- RGB lighting 16.8M colours
- Ultralight design (67 g)
- PixArt PMW3325 sensor
- 8,000 maximum DPI
- Kailh GM 4.0 60M mechanical switches
- 6 programmable buttons
- "Paracord" cable
- PTFE mouse feet
- 2 years warranty

Endorfy GEM Onyx White – technical specifications:

- Product code: EY6A012
- EAN: 5903018666624
- Product type: mouse
- Type of mouse: wired
- Colour: white
- Dimensions: 126×65.7×38.5 mm
- Sensor: PixArt PMW3325
- Sensor type: optical
- Maximum tracking speed: 2.54 m/s
- Maximum sensitivity: 8,000 DPI
- Base sensitivity options:
 - 400
 - 800
 - 1000

- 1500
 - 2000
 - 3000
- Microswitches: Kailh GM 4.0
- Microswitches service-life: 60 million clicks
- Connectivity:
 - USB-C, cable length: 1.8 m
- Backlight type: ARGB
- Feet: PTFE
- Warranty: 24 months

Endorfy GEM Onyx White – logistics data:

- Retail box dimensions: 95×50×145 mm
- Weight (net): 67 g (±1)
- Weight (gross):
- Master carton dimensions: 530×310×320 mm
- Master carton weight (gross):
- Product quantity in master carton: 60 pcs

Set includes:

- GEM Onyx White mouse
- Extra set of mouse feet
- Sticker
- Safety instruction
