## Saves up to 80% energy

LED technology saves up to 80% energy compared to your standard bulb. It therefore pays for itself and saves you money year after year. It also helps to protect the environment.

## Perfect for decorative fixture

Modern lighting in Philips LED candles for use in decorative fixtures such as in chandeliers, ceiling fans, vanity strips and post lights.

## No UV or IR

The light has no infrared component, so no heat is radiated. Also, there is no ultraviolet component in this light. These two characteristics mean that this light will not cause fabric and other items to fade.

## Learn about light

Colour temperature: Light can have different colour temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more tranquil light, while those with a higher Kelvin value produce a cool, more energising light. CRI: The colour rendering index (CRI) is used to describe the effect of a light source on colour appearance. Natural sunlight has a CRI of 100. The CRI of Philips LED light bulbs is always higher than 80, which ensures that colours are shown as true and natural.
