

## Backpack Power Kit Premium

Sporty notebook backpack with power bank

**This backpack combines a sporty look with well-designed functionality and reliable protection for your device. The lockable main compartment with high-density foam padding ensures your notebook will arrive safely at its destination. The handy spare power bank provides all the power you need, making you perfectly equipped for any adventure.**

The main compartment has a 20 litre capacity, so notebooks up to 15.6" can be safely stored, while padding and an elastic Velcro fastening ensure that they are held really securely. The special pocket for tablets up to 10" means your mobile device will be well protected too. The useful compartments in the front pocket give you well-organised storage for your power bank, smartphone and other mobile accessories. Your water bottle and umbrella can be stored in the outside pockets, saving you space inside, and the backpack can be kept compact by tightening the compression straps on either side. The breathable padding on the back and the adjustable shoulder straps give you added comfort, and the reflective strips make you visible in night traffic. Charge up your mobile devices the easy way when you're out and about. The reusable 2600mAh power bank has an impressively handy design. This spare power pack is compatible with all common smartphones and tablets, and after use it can be recharged easily using the micro USB cable included ( $\geq 500$  charges).

\* smartphone is not included
