Single-sided over-ear USB headset - affordable quality sound for home, office and call center

The Manhattan Mono USB Headset is your versatile audio tool for common calling applications, such as Skype, Teams or Zoom, across all platforms and operating systems. Whether you're participating in a conference call, listening to a webinar or talking to a customer, you'll get reliably clear sound quality every time. Your hands stay free, so you can type, enter numerical data and more.

Plug and play, wired for business

Ready to go out of the box, this one-sided USB Headset lets you start talking and listening as soon as you plug in its single USB-A connector to your device. It works no matter what operating system your device supports, and you never have to worry about empty batteries since it's USB powered.

Comfortable all-day wear with rotatable microphone for maximum versatility

The one-ear headset's lightweight, adjustable headband features an ultra-soft over-ear cushion that gives hours of comfort. You can easily reposition the flexible boom mic for better voice capture and then move it out of the way when you're done making calls. It is also reversible, so you can wear it on the right or left side, depending on the direction you'd want to hear things from outside the headset.

Convenient in-line control

Convenient controls located on the USB Mono Headset's cord make it easy to adjust the volume or mute the mic and speakers individually, all without disrupting the call or your workflow.
