Shovels

Product reference
3100MFV

Long Fiberglass Handle Pointed Shovel / 3100MFV

Brand

Bellota

EAN code

8414299533866

Use

Ideal for easily removing soil. Reinforced design to aid its
insertion into the soil.

Bullet points

This shovel is forged in one single piece and made of Bellota special steel.

It has the perfect curvature for emptying the soil, as well as reinforced shoulders to facilitate insertion into the soil.

It won't let you down. Heat treated to prevent deformation. Curved blade for emptying soil.

You will work the soil easily. Long hollow fibreglass handle with two foams for a better grip.

Description

Stamped pointed shovel for emptying soil, made of special heat-treated steel to extend the service lifespan of the tool. It has an extra-long handle made of hollow fibreglass. The long handle has two grip zones for comfortable planting and transplanting work, as well as for easy and comfortable levering.
