

With the MeeStick M100, you get the perfect portable streaming media player to transfer data from the smartphone to your TV.

Play videos in Full HD 1080p, watch your photos in full size or listen to your favorite music – all directly from your smartphone or tablet via WLAN on your HD TV!

Please make sure you have the latest firmware after buying your MeeStick. To do this, go to "Downloads" and click on the link "Firmware MeeBox + MeeStick (53.83 MB)" and install it via USB stick on the MeeStick. If you would like a more modern user interface, you can also install "Firmware MeeBox + MeeStick Version 7 (201.38 MB)", which is only available in English.

After, install iMediaShare® (Android) or iMediaShare® and Flipps TV® (iOS) apps on your smartphone/tablet. Now connect to your MeeStick via WLAN and conveniently control your content via the app or with the enclosed remote control. In addition, you can also connect other USB storage devices, such as an external hard disk, to your MeeStick and display your media data.

Specification

CPU	MediaTek® 8633 ARM11 (1080p Full HD Video Decoder, up to 80Mbps and 60fps)
Compatible Devices (Smartphones and tablets)	IOS 5.0 or higher Android with MeePlayer APP
Resolution	1080p HD
