

Product name: ENDORFY Thock TKL IT Brown
Product code: EY5G003

It's dangerous to go alone! Take the ENDORFY Thock TKL IT Brown. Pack up your backpack and conquer the distant esports tournaments without worrying about your equipment ever again.

We reinforced its chassis with an aluminum ~~shield~~ [plate](#) and fitted it with 87 keycaps with an Italian layout. Underneath each key lies hidden a "tactile" Kailh Brown mechanical switch — registering even subtle keypresses while still granting you the certainty of feeling the activation bump. You'll never miss another dodge.

Small size, [big](#) bang

ENDORFY Thock TKL IT Brown might be small, but you'll be surprised how much it can boost your performance. It's all bang bang bang now, no time to waste.

Allow yourself to be charmed by this petite wonder, especially if you play FPS or battle royale games. This keyboard leaves more space for the mouse — imagine the flickshots possible with such freedom of movement!

To make all of that happen, we ditched the numpad entirely. The ENDORFY Thock TKL IT Brown is here to win, no dilly-dallying.

Kailh Brown switches

Who would want a one-trick pony in today's economy? Not us. If you too like your keyboard to be ready for any and all tasks, you'll love the ENDORFY Thock TKL IT Brown.

Each one of the 87 keycaps houses a Kailh [Brown](#) switch — they'll deal with any boss in no time, including the office kind. We tested that ourselves on multiple presentations and numerous product descriptions. ;)

Kailh Brown are tactile switches, made for situations that require smooth [and subtle](#) movements. They're also durable, with an estimated lifespan of as many as 50 m clicks (and thanks to the N-Key Rollover, each and every click is recorded and executed, period).

And as a bonus, the keyboard is quite... quiet. We're sure it'll find many fans among the night owls (and their grateful roommates).

Keycaps made of ABS

The ENDORFY Thock TKL IT Brown is a mechanical keyboard that lets you ~~tell~~ [write](#) your story – defeat virtual enemies, win races, chat with your friends... Anything you want.

All thanks to durable ABS keycaps. They won't crack (literally!) even in the most intense battles, are very pleasant to the touch and hold your fingers well. Plus, they look beautiful with ARGB backlighting, so you can expect a few jealous looks from your team.

We're going on an adventure!

A last-minute change of plans? Not a problem. The ENDORFY Thock TKL IT Brown is always ready for new adventures. This keyboard is small and lightweight, so you can take it with you everywhere you go.

Its chassis reinforced with an aluminum top is rigid and damage-resistant — ready to withstand the toughest conditions. It firmly holds the desk, so it doesn't move around even when you're gaming or working for hours on end. It looks the part too — engraved patterns on the bottom and the [ARGB](#) backlight give it a fierce edge.

My name is RGB. [ARGB](#)

Let's face it — keyboards without a backlight are fine. But if you like the darkness of the night, want to stand out from the crowd, or impress your followers, then [ARGB](#) is a must-have.

Customize the look of the ENDORFY Thock TKL IT Brown to complete the battle station of your dreams. Highlight each of the 87 keys in a different color, differentiate the core keys with a separate hue or set a single effect across the board. You can do this with the help of the included software or directly from the keyboard.

Perhaps some will say it's unnecessary and a gizmo (you can always disable it entirely)... but if you like to play with the look of your setup every now and then, the ARGB backlighting is the thing for you.

Adjustable angles

To make clicking even more comfortable, we equipped the ENDORFY Thock TKL IT Brown with [adjustable](#) feet. With them, you can place the keyboard at an angle that best suits your needs.

And if you want additional support, you can equip it with a matching Thock TKL Palm Rest (available separately) – a magnetic add-on that'll keep your wrist comfortable, allowing you more time at the PC. Some people use it as a stand for a coffee mug – but we haven't tested that. Yet.

Cable management made easier

The ENDORFY Thock TKL IT Brown keyboard chassis allows you to route the cable in three different ways, helping you make better use of your desk space.

It's possible thanks to a [detachable](#) cable and three custom-made channels on the bottom of the keyboard, allowing you to arrange the cable conveniently — for example, closer to the grommets or at the edge of the table.

Everything [Keyboard](#) under control

Do you like to have everything [keyboard](#) under control? We thought of that — and equipped the ENDORFY Thock TKL IT Brown with functional and feature-packed software.

We fondly refer to it as “God mode”. With its help, you’ll adjust all keyboard settings to your needs — whether it’s changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Thock TKL IT Brown – main features:

- TKL mechanical keyboard
- Modern design
- Configurable RGB backlighting
- High durability
- Kailh Brown mechanical switches
- Detachable cable
- Adjustable feet
- N-Key Rollover function
