QT03A - Black

Technical Data

Case Type	Midi-Tower
Form Factor	E-ATX, XL-ATX, ATX, M-ATX, ITX
3,5 inch drive bay internal	3 x
2,5 inch drive bay internal	3 x
Case fan (front)	3 x 120/140 mm
Case fan (rear)	1 x 120/140 mm
Height	ca. 497 mm
Width	ca. 216,4 mm
Depth	ca. 475,5 mm
Weight	ca. 11,1 kg
Material	Stahl
Maximum VGA Card Length	400 mm
Maximum height of CPU coolers	172 mm
Code	4250140357106
Manufacturer number	QT03A B
Order number	600045710

Logistical Data

Height (packaging unit)	580 mm
Width (packaging unit)	310 mm
Depth (packaging unit)	570 mm
Gross weight (packaging unit)	12,2 kg
pcs per pallet	12
Harmonized code	84733080000

Jonsbo QT03A - Black, Midi Tower, E-ATX, 2 x USB 3.0, 2 x USB 2.0, Aluminiumfront, 3 x 120 mm Lüfter, silber

With the QT03A, we present a classy midi tower from the QT series, a simple front made of brushed aluminum, combined with high-quality side panels which are made of 5 mm thick "tempered glass".

While remaining faithful with the design of the QT01, the case comes with a straight forward front of solid aluminum. The I/O-Panel can be found on the front of the top cover and offers a 3-stage fan control, as well as 2 x USB 2.0 and 2 x USB 3.0, in addition to the mandatory HD audio connections. A special feature of the QT03A is that the I/O-Panel is separated from the rest of the front. This means that the front can be removed for cleaning the dust filters, without any effort.

The QT03A is designed for very minimum noise emission. The front and the top cover of the case are provided with sound-absorbing materials. In combination with the sound-insulated front panel, decoupled mounting of the hard drives and power supply, vibration-decoupled feet, as well as the pre-installed fan control, that allows almost no noise to reach the outside of the case.

The ventilation system of our QT03A is designed to deliver the best possible cooling performance with the least possible noise. Up to four 120 or 140 mm fans can be installed in the case. Three 120 mm fans are already included; In addition to the already mentioned fans in the front, another is mounted at the rear of the case. Silent air intakes ensure enough fresh air is fed into the case interior, even with the front door closed. The PCI slot covers are perforated for very efficient case ventilation. Another 120 or 140 mm fan can be installed behind the front.

The QT03A has a 3-stage fan control for up to 5 fans. You can choose between the high stages for maximum case ventilation and low for the exceptionally smooth operation of the fan. If necessary, the fans can also be switched off.

Interesting for fans of water cooling is certainly the possibility, that the QT03A can be equipped with a radiator behind the front. For example, 120/240/360 mm coolers can be installed as well as 140 or 280 mm radiators. There is approximately 65 mm space between the front and the power supply cover available. Please note this when selecting your radiator.

A further special feature of the QT03A is the two-piece of the chassis. The power supply and hard drives are separated from the mainboard area. Thus a thermal separation of the two regions is ensured. The dust filter under the power supply can easily be removed and cleaned. Another dust filter can be found behind the front.

The hard drive cage of the QT03A accommodates up to two 3.5 inch drives. The hard drives is decoupled and installed without any tools. At the back of the mainboard rack, there are three brackets for installing 2.5-inch SSD.

The QT03A offers innovative cable management with a specially designed mounting plate, which not only facilitates cable routing, but it can also be used to support long VGA cards. Seven PCI slots for expansion card installation are available on the rear panel.
