Overview

(120 Words or less)

Dominator Platinum high-performance DDR4 memory is designed for world-class system builds. It's built with hand-screened ICs, undergoes rigorous performance testing, and incorporates patented DHX cooling for reliable performance in demanding environments.

The DDR4 form factor is optimized for the latest Intel X99 and 100 Series motherboards, and modules are compatibility-tested across multiple X99 and 100 Series motherboards for reliably fast performance. Extracting maximum performance is easy -- built-in XMP 2.0 support gives you trouble-free, automatic overclocking.

Dominator Platinum modules work with the Corsair Link system for temperature monitoring, and you can even enhance the subtle white LED lighting by adding a light bar kit (available separately) to match or contrast it with your system.

Features

Feature	Benefit
Hand Screened Performance IC's	Using best of the best IC's available leads to highly overclockable memory
DHX cooling	Patented technology pulls performance-robbing heat away from the modules and allows Dominator memory to run at a cooler temperature.
Customizable light bar	Customize the look and feel of your memory with upgradable light bars and Dominator Airflow LED fan.
Performance and Compatibility	Dominator Platinum DDR4 is optimized and compatibility tested for the latest Intel X99 and 100 Series motherboards and offers higher frequencies, greater bandwidth, and lower power consumption. XMP 2.0 support for trouble-free automatic overclocking.
Corsair Link compatibility	The Corsair Link Digital connector allows you to monitor your memory's temperature for an optimal combination of performance and stability.
