SHX70HS1200

Highlights

1200 watt heating power

2 power levels

Quartz heating element

IP24 protection class

Low noise

Scope of delivery

- Wall heater
- Mounting material
- Operating instructions

Warranty period

- 2 years

The SHX70HS1200 quartz radiator guarantees immediate, spot heat via infrared radiation without a long start-up time!

This corresponds to the natural principle of the sun and heats up the direct surroundings from the first moment it is switched on.

This makes it the ideal solution for your covered balcony, covered terrace, workshop or in your living rooms. The quartz radiant heater has two heating levels with 600 watts or 1,200 watts of heating power.

In order to direct the heat radiation precisely, the inclination of the quartz radiator can be adjusted. The heater is conveniently operated via an integrated pull switch.

Specifications:

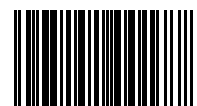

- Ideally suited for living rooms, balcony, workshop, garage
- Mains voltage: 230 V
- For rooms up to approx. 20 m²
- max. heat output 1,200 watts
