Before You Pair Your Matter Outdoor String Lights

Your Nanoleaf Matter Outdoor String Lights can run on Wi-Fi, Bluetooth or Matter over Wi-Fi.

The way you would like to control your lights will determine which you use, and what features you will get access to.

	Nanoleaf App	Smart Home Ecosystem
Connect via:	Wi-Fi, Bluetooth	Matter over Wi-Fi
Requires:		Matter Compatible Hub & Latest firmware on devices
16M+ Colors	✓	✓
Tunable White (2700 - 6500K)	✓	✓
Brightness Control	✓	✓
Color-Changing Scenes	✓	
Create Your Own Color Palettes	✓	
Magic Scenes	✓	
Set Schedules		✓
Voice Control		✓
Remote Access (away from home)		✓

We always recommend pairing with the Nanoleaf App first, before pairing to a smart home ecosystem for additional features.

To connect to a smart home ecosystem, you will require:

1. A Matter compatible smart home hub (e.g. Apple HomePod mini & HomePod 2nd Gen, Google Home Mini & Nest Hub 2nd Gen, Amazon Echo 4th Gen)
2. The latest software and firmware on your devices and apps, including a min. of iOS/tvOS 16.5+ or Android OS 8.1+

Standard Pairing Process with iOS

To ensure a smooth pairing process, please make sure you have the following things ready.

Your Device

Requires iOS 15.4+, turn ON Bluetooth for pairing

Note

iOS 16.5+ is required to pair with a Smart Home Ecosystem

2.4 GHz Wi-Fi

2.4 GHZ Wi-Fi is required. 5 GHz networks are not compatible with Nanoleaf products. You can also use Bluetooth as a backup to operate your product.

Pairing Code

A QR code and/or 11 digit code on your Quick Start Guide or on the back of the Controller.

1

Download and Open the Nanoleaf App

You can find the official Nanoleaf App in the [App Store](#). Make sure you have the latest version.

2

Pair Your Matter Outdoor String Lights

1. On the Dashboard, tap the pencil icon in the top right corner.
2. Tap "Add Device +"
3. The app will automatically open up the pairing window.
4. Follow the instructions on the screen to either:

Option A

Scan the QR code

Option B

Enter the 11-digit pairing code found on the back of the Controller or Quick Start Guide.

5. Your Outdoor String Lights should now be connected and ready for App setup.
6. If a Matter compatible smart home hub is detected in your home, the Nanoleaf App will give you an option to connect your light to Matter and a smart home ecosystem.

Option A

You can always connect to a smart home ecosystem at a later point by accessing your Outdoor String Light settings within the Nanoleaf App and tapping Connections.

7. Pairing must be initiated within 15 minutes of the light being powered on. Disconnect and reconnect your lights from power to re-enable Matter pairing (this only works when the device has not already been paired via Matter).

Keeping your Outdoor String Light firmware up to date helps to ensure a smooth experience. The Nanoleaf App will occasionally show a prompt for you to update your firmware.

Standard Pairing Process with Android

To ensure a smooth pairing process, please make sure you have the following things ready.

Your Device

Requires Android 9+, turn ON Bluetooth, and Google Play Services app version 22.48.14. Ensure your location settings are enabled on your device.

2.4 GHz Wi-Fi

2.4 GHZ Wi-Fi is required. 5 GHz networks are not compatible with Nanoleaf products. You can also use Bluetooth as a backup to operate your product.

Pairing Code

A QR code and/or 11 digit code on your Quick Start Guide or on the back of the Controller.

1

Download and Open the Nanoleaf App

You can find the official Nanoleaf Smarter Series App in the [Google Play Store](#). Make sure you have the latest version.

2

Pair Your Matter Outdoor String Lights

1. On the Dashboard, tap the pencil icon in the top right corner.
2. Tap "Add Device +"
3. The app will automatically open up the pairing window.
4. Follow the instructions on the screen to either:

Option A

Scan the QR code

Option B

Enter the 11-digit pairing code found on the back of the Controller or Quick Start Guide.

5. Your Outdoor String Lights should now be ready to go on the Nanoleaf App!
6. If a Matter compatible smart home hub is detected in your home, the Nanoleaf App will give you an option to connect your light to Matter and a smart home ecosystem.

Option A

You can always connect to a smart home ecosystem at a later point by accessing your Outdoor String Light settings within the Nanoleaf App and tapping Connections.

7. Pairing must be initiated within 15 minutes of the light being powered on. Disconnect and reconnect your lights from power to re-enable Matter pairing (this only works when the device has not already been paired via Matter).

Keeping your Outdoor String Light firmware up to date helps to ensure a smooth experience. The Nanoleaf App will occasionally show a prompt for you to update your firmware.

Pairing with Smart Home Ecosystems

To pair with a smart home ecosystem, you must have:

1. A Matter-compatible smart home hub that is already paired to your ecosystem
2. The latest software and firmware on all your devices and apps (min. iOS/tvOS 16.5+ or Android OS 8.1+)

We recommend pairing first with the Nanoleaf App to ensure the smoothest experience. Refer to the standard pairing process above for instructions on how to pair with the Nanoleaf App.

Starting in the Nanoleaf App:

After pairing in the Nanoleaf App, you will be presented with a “Add To An Ecosystem” screen if a Matter compatible smart home hub is detected in your home:

Tap the Connect button.

iOS

On iOS: you will automatically be prompted to add the light to Apple Home.

Android

On Android, you will be shown a menu with the following:

- Options for supported apps for direct pairing (select one and you’ll be directed through the setup flow in that app)
- “Use pairing code” – select this if the app you want to pair with is on the same phone/tablet but doesn’t show up in the list.
- “Use QR code” – select this if the app you want to pair with is on a different phone/tablet, then open the app on your other device and scan the new QR code.

If you do not see the “Add To An Ecosystem” screen, or if you wish to do this at a later date, you can always do so by accessing your Outdoor String Lights settings within the Nanoleaf App and tapping Connections.

Starting in your Ecosystem App:

If you wish to pair directly with one of the ecosystems, ensure the following requirements are satisfied:

1. A Matter-compatible smart home hub for that ecosystem is already paired
2. Latest software and firmware on all your devices and apps (min. iOS/tvOS 16.5+ or Android OS 8.1+)
3. This is the first ecosystem you’re pairing your Essentials to. If you’ve already paired with one ecosystem via Matter and want to share with a second ecosystem, follow the [steps here](#).
4. Pairing must be initiated within 15 minutes of the light being powered on. Disconnect and reconnect your lights from power to re-enable Matter pairing (this only works when the device has not already been paired via Matter).

Then, proceed with the following steps in the links below for your desired ecosystem:

Apple Home

[Apple Instructions](#)

Google Home

[Google Instructions](#)

Amazon Alexa

[Alexa Instructions](#)

Samsung SmartThings

[SmartThings Instructions](#)

** Pairing with Apple Home is only available using an iOS device.*

Sharing Matter Devices between Ecosystems

One of the promising features of Matter is [Multi-Admin](#) which lets you share your Outdoor String Lights between ecosystems. Using this feature, it can be controlled by any or all of the ecosystems (ie. Apple Home, Google Home, Amazon Alexa, and Samsung SmartThings) simultaneously!

INSTRUCTIONS

Controlling your Matter Outdoor String Lights

Controller

Nanoleaf Outdoor String Lights comes with 9 preset color Scenes. These can be accessed directly through the button on the controller, without downloading the Nanoleaf app.

Cycle through to next preset Scene

Single Press

Cycle through a Warm White, Cool White & 3 RGB Colors

Double Press

Increase brightness by 10%

Single Press

Decrease brightness by 10%

Single Press

Turns lights ON/OFF

Press & Short Hold (1s)

Reset device will flash red 3 times if successful

Press & Long Hold (10s)

Nanoleaf App

With the Nanoleaf App, you can turn your lighting on/off, control brightness, group lights by room, create your own color-changing Scenes or explore thousands of already made ones.

Nanoleaf Outdoor String Lights feature addressable LED Bulbs so there are endless possibilities to customize your lights!

Dashboard

Control your rooms and devices. Click on a specific device to adjust brightness, change the Scene it's playing, or create your own Scene!

Discover

Find and download new Scenes created by the Nanoleaf community. Search up any word or phrase to get inspired by what others have created or have our Magic Scene generator create a color palette inspired by your search term.

Resources

Find helpful information including tutorials, app features and integrations.

Smart Home Ecosystems

Nanoleaf Outdoor String Lights are Matter-enabled and work with Apple Home, Google Home, Amazon Alexa and Samsung SmartThings. To control your lights with a smart home ecosystem, you must have:

1. Matter compatible smart home hub (e.g. Apple HomePod mini & HomePod 2nd Gen, Google Home Mini & Nest Hub 2nd Gen, Amazon Echo 4th Gen)
2. Latest software and firmware on your devices/app (min. iOS/tvOS 16.5+ or Android OS 8.1+)

Through a smart home ecosystem, you will be able to:

1. Change the color of your Outdoor String Lights (single color Scenes only)
2. Adjust brightness
3. Set Schedules
4. Use Voice Commands
5. Control your device away from home

Voice Control

You can control the **Nanoleaf Outdoor String Lights** by voice in a few different ways if you connect it to a smart home ecosystem and Matter compatible hub.

Make sure to name your device something simple in the Nanoleaf/smart home ecosystem app. Use your smart home ecosystem's voice assistant to utilize voice control.

Hey Siri...

"Turn [Device Name] on/off."
"Set [Device Name] to 10% brightness."
"Brighten/dim the lights."
"Brighten/dim the lights to [%]."
"Set [Device Name] to [Color]."

Okay Google...

"Turn on [Device Name]."
"Turn on/off the lights in [Room Name]."
"Turn on/off all my lights."
"Turn off [Device Name]."
"Brighten/dim [Device Name]."
"Brighten/dim all my lights."
"Set [Device Name] to [%]."
"Set [Device Name] to [Color]."

Reset Options

To reset your Outdoor String Lights, hold the power button on the controller for 10 seconds while the device is plugged in and powered on. The string lights will flash red 3 times after a successful reboot.

After this reset, starting the pairing process again.

CONTACT SUPPORT

FAQ

1

How weatherproof are these Outdoor String Lights?

The string lights are rated IP65, which means it is dust and water resistant, making it well suited for year-round use! The outdoor controller is rated IP67 and the power supply unit is rated IP44, which means they're also water and dust resistant. Our lights are very durable for the outdoors, but should not be submerged or used in extreme weather conditions like a flood/heavy storm.

2

What colors can I set my outdoor string lights to?

Choose from 16M+ colors, including warm and cool whites! You can display a single color across your string lights, or multiple colors all at once.

3

Can I replace the bulbs on these Outdoor String Lights?

Our Outdoor String Lights contain built-in RGB LEDs which can not be replaced. If you're having an issue with some of the bulbs, please contact us for support.

4

Can I attach additional strings together?

Yes, you can! You can purchase an Outdoor String Light Expansion Pack to add on to your Outdoor String Lights Smarter Kit. You can extend your Outdoor String Lights up to a maximum of 45m (147ft).

5

How do I hang my outdoor string lights?

Common mounting methods include screws, S-hanger hooks, Q-hanger hooks and zipties. Select the method that best suits your space.

6

Can these be cut or customized in length?

The Outdoor String Lights cannot be cut or made shorter, and attempting to do so will damage your product. If you want to customize your Outdoor String Lights by making it longer, you can purchase an Outdoor String Lights Expansion Pack to extend your product by 15m (49ft). You can extend your Outdoor String Lights up to a maximum of 45m (147ft).

7

Are these Matter, Wi-Fi or Bluetooth compatible?

You can control the Nanoleaf Outdoor String Lights over Bluetooth, Wi-Fi or with Matter over Wi-Fi.

You can connect your lights to the Nanoleaf App via Wi-Fi or Bluetooth. Connecting to a smart home ecosystem app is done via Matter over Wi-Fi and requires a Matter compatible hub.

There is also the option of using the easy access controller that is attached to your Outdoor String Lights for some quick actions.

8

Can these Outdoor String Lights only show a single color at once?

There are several types of Scenes for you to choose from! With the Nanoleaf App, you can choose from or create your own static single color Scenes, animated multicolored Scenes and/or Rhythm Scenes (reacts to sound & music).

Even the default Scenes that you can access directly through the controller are a mix of static color Scenes, animated Scenes and Rhythm Scenes.

9

How do I connect my device to a Smart Home Ecosystem app using Matter?

To connect your Matter Outdoor String Lights to a smart home ecosystem like Apple Home, Google Home, Amazon Alexa, or Samsung SmartThings, you will need the following:

1. A Matter compatible hub that is already set up in your home.
2. Latest software/firmware on all your devices.

We recommend pairing with the Nanoleaf App first, and then following the instructions within the App to pair with a smart home ecosystem. Refer to the [Pairing with Smart Home Ecosystems](#) section for more details.

10

How do I control my lights with voice commands?

To access voice commands, your lights must be connected to a smart home ecosystem using Matter. Once connected, you will be able to use common voice commands with your chosen voice assistant to control your lights. See the [Voice Control](#) section for more details.

11

How do I change the colors on my lights with the Controller?

When your lights are on, you can cycle through the preset Scenes with a single press on the button on the Controller.

You can also cycle through a Warm White, Cool White, Cyan, Magenta, and Yellow by doing a quick double press.

12

How do I create my own animated color Scenes?

Go to the Nanoleaf App Dashboard, and click on the device you'd like to create a new Scene for (this can later be shared with other Nanoleaf devices).

Hit "Create Scene" to create your own single colored, or dynamic (multiple colors and/or motion) Scene!

You can also try out Magic Scenes for some AI magic – simply type in a phrase or word, and watch as a color palette is automatically generated for you.

13

Can my lights react to music

Yes! Two of the nine present Scenes are sound and music reactive. You can easily access this through the Controller.

You can also explore more Rhythm Scenes through the Nanoleaf App (look for Scenes with a music note icon) and create your music reactive Scenes!
