RL-S24V-24PK-R1

## Seidon 240V

The Seidon 240V is the latest AIO watercooler that boasts an excellent value for performance. The compact 240mm radiator fits in virtually every case. Thanks to dual Silencio fans designed for silence, Seidon can unleash a powerful cooling storm at your command and keep it silent. Durable FEP Tubing provides the advantages of nearly no moisture absorption, high thermal stability and high pressure tolerance which all contribute to a long operating life.

## Product Features

1. Factory filled with coolant, then sealed and pressure tested - requires zero maintenance for years.
2. Highly optimized pump and water block guarantees the best water flow and system performance.
3. Specially designed 240mm radiator provides superior heat dissipation and fits in almost any case internally and externally.
4. Dual 120mm Silencio fans with a wide RPM range to dissipate the heat silently.
5. Applied micro channel technology for the best cooling performance
6. Blue LED indicator lights up when it is operating

## Package Information

|                    |                    |
|--------------------|--------------------|
| EAN Code           | 4719512052969      |
| UPC Code           | 884102029073       |
| Package Dimensions | 265 x 135 x 268 mm |
| Carton Dimensions  | 587 x 576 x 364 mm |
| Unit / Carton      | 8 pcs              |
| Carton / Pallet    | 24                 |

## Specification

Make It Yours.

Factory filled with coolant then sealed and pressure tested - requires zero maintenance for years.

Precision machined Microchannels maximize the water contact surface too quickly dissipate heat.

The best optimization pump and water block guarantees the best water flow and system performance.

Dual Silencio fans to increase the performance

The FEP tubing allows maximum, unrestricted waterflow and decreased evaporation rate for greater durability

Elegant Blue LED illumination on the top of water block
