- Grind-off function for using ground coffee
- Select easily the coffee settings with the LCD display

Easy to experience

- Drip stop to pour a cup of coffee whenever you like
- Water level indication for easy filling
- Swing filter holder for easy filling of coffee
- Adjustable keep-warm time

PHILIPS

Highlights

Aroma twister

This smart nozzle inside the jug circulates the inflowing coffee evenly through the jug for an optimal and consistent aroma, from the first to the last cup.

Integrated bean grinder

To have the delicious taste of freshly ground coffee, fresh coffee beans are grinded before brewing. This coffee maker has conical burr grinders to have the optimal grind size, which ensures the best taste.

Grind selector knob

Personalize the coffee taste, by choosing between 3 grind options. Select a fine grind for

a stronger coffee taste or coarse grind for a lighter, smooth filter coffee.

Ground coffee brew

You can also use ground coffee instead of coffee beans. The grind-off function disables the grinder and you can simply fill ground coffee into the filter.

Strength select

Adjust the intensity of your coffee from mild, medium or intense coffee.

Drip stop

The drip stop allows you to pour a cup of coffee before the full brewing cycle is finished.

Swing filter holder

The filter holder is opened by swinging it to the side, which makes the filling of coffee easy. The filter holder is also detachable, for easy cleaning.

Easy selection of settings

Thanks to the LCD display and unique brewing knob, you can easily select the coffee settings you prefer, for instance the number of cups and coffee strength.

Water level indication

Fill the water tank easily and precisely with the water level indication.

Specifications

Accessories

- Included: Glass jug

Sustainability

- Power consumption brewing: 1000 W

General specifications

- Coffee drinks: Drip filter coffee
- Compatible coffee serving: Whole coffee beans, ground coffee powder
