

MT-03

Technical Data

Case type	Mini-Tower
Form factor	Micro-ATX, Mini-ITX
3,5 inch drive bay internal	2 x
2,5 inch drive bay internal	max. 2 x
Case fan (front)	3 x 120 mm (optional)
Case fan (rear)	1 x 120 mm
Height x Width x Depth	390 x 190 x 405 mm
Weight	2,9 kg
Material	Steel, plastics
Maximum VGA Card Length	330 mm
Maximum height of CPU coolers	165 mm
Code	4250140354402
Manufacturer number	CT MT-03

Logistical Data

Height (packaging unit)	475 mm
Width (packaging unit)	240 mm
Depth (packaging unit)	445 mm
Gross weight (packaging unit)	3,7 kg
Pcs per pallet	24
Harmonized code	84733080000

Cooltek MT-03, Micro-ATX Mini-Tower, 2 x USB 3.0, SD/MMC/MS Kartenleser, 1 x 120 mm Lüfter (hinten), schwarz

With the MT-03 we are expanding our portfolio by a solid and versatile mini tower for Micro-ATX systems, which is also the perfect base for high-quality office PCs.

Visually, the black lacquering that covers the entire exterior is dominating. Only the LED strip at the top of the front, which combines the power and HDD LEDs, attracts the attention. A fine MESH element covers the lower part of the front.

The easily accessible I/O panel with 2 x USB 3.0, HD-Audio and the power button, is hidden on the left side of the front. On the right is built in an SD/MMC/MS card reader. Appropriate peripheral devices can quickly and easily be connected from the front.

The case is characterized by a stable and high quality processed steel chassis - folded and deburred edges protect against cuts during the installation of the hardware. The interior construction is divided in two separated zones. So the power supply and the HDD cage are separated from the mainboard area by a steel jacket. This lends the chassis excellent stability and allows a certain thermal separation between the power supply and the mainboard area.

Internally, the MT-03 offers a HDD cage for up to two 3.5 inch drives. The drives are mounted without tools in practical HDD slides. Two 2.5 inch SSD can be mounted on the mainboard tray.

The motherboard tray offers a generous opening for the mounting of CPU-coolers with bolt-thru kit, when the motherboard is already installed. CPU coolers can thus be changed without disassembling the motherboard first.

At the rear of the case, a silent running 120 mm fan is preinstalled. In addition, three 120 mm fans can be mounted behind the front panel, in order to supply fresh air from the outside. The MESH element in the lower part of the front is equipped with a dust filter, which can easily be removed and cleaned.

A special feature of the MT-03 is the possibility to mount a 240 mm compact water cooling system behind the front. The MESH element and the generous air slots on both sides of the front, allow a continuous fresh air supply.

Graphics cards with a maximum length of 330 mm can be accommodated in the MT-03 and CPU coolers with a maximal installation height of 165 mm. Please note that installation of VST cards is restricted.

The MT-03 is designed for standard ATX power supplies. You can install both Micro-ATX as well as Mini-ITX motherboards.
