

V8 PERFORMANCE JUGGERNAUT WITH DAZZLING RGB

HP V8 DDR4 SO-DIMM

Developed by HP for eSports specifications on desktop computers, the HP V8 DDR4 contains an over-clocked module with a minimum frequency of 3000 MHz, providing instant responsiveness for game loading and PK operation. The HP V8 DDR4 RAM comes with a brushed metal cooling vest and cream-white light strips. Custom RGB lighting effects spark the ultimate gaming passion.

PRODUCT FEATURES

Ⓞ DDR4 overclocked RAM provides powerful gaming support

The high-performance overclocked module supports one-key setup and auto-overclocking, helping gamers maneuver at lightning speed and crush their opponents like a juggernaut.

Ⓞ Seamless lighting command with dazzling synced RGB effects

Supports mainstream lighting integration software (Asus, Gigabyte, MSI, ASRock, etc.) with synced control of system and dazzling RGB lighting, offering ultimate visual impact.

Ⓞ Highly effective cooling function sustaining speed for longer periods of time

Pure-aluminum cooling vest channels off heat with high thermal conductivity. The vest increases the chip's surface area of contact with the air to dissipate heat and cool down the chip more quickly.

Ⓞ Broad compatibility for worry-free configuration

The device has passed the compatibility tests for the DDR4 motherboards of major brands, which means stable operation for long periods of time.

HP's Strengths

A world-renowned IT company and a Fortune Global 500 corporation, HP's business areas include IT infrastructure, storage memory, commercial and home computers, printers, and digital imaging. It has been the leader in PC shipment volumes globally for many years, and is a brand trusted by professionals in billion-dollar industries around the world.

HP continues to break frontiers in memory technology and the development of innovative memory products. It stays true to its commitment to bringing top-quality and reliable memory products and services to consumers around the world.

HP is able to provide comprehensive after-sales services to users through its extensive global after-sales system and service network.

HP V8 DDR4 U-DIMM

RAM type	DDR4
DIMM type	U-DIMM
Frequency	3000 MHz/3200 MHz/3466MHz/3600 MHz
Capacity:	8GB/16GB
Rank	1Rx8/2Rx8
Voltage	1.35V
Operating temperature	0°C~85°C
Dimensions	148x38.90x8.50mm
Weight	≤ 58g (with cooling vest)
Pin	288 Pin
Warranty	Lifetime product warranty
Certifications	RoHS, CE, FCC, VCCI, RCM, cTUVus
Remarks	Product appearances may vary according to different models. The images are for reference only. Kindly check the actual products.
