

INLINE® TABLET HOLDER WITH METAL BASE PLATE, UP TO 12.9", BLACK

The InLine® Tablet holder with stand is the ideal accessory for demanding application situations. Thanks to the solid 4.9kg heavy and 32x32cm large base plate, this tablet holder has a particularly firm stand even without being attached to the floor. Devices can be operated safely and securely in the holder without the holder moving or tipping over. Equipped with a telescopic support and two-part arm, the tablet holder offers a working height of up to 1.63m. With the variable clamps, it fits tablets from 4.7" to 12.9". The viewing angle can be individually adjusted to suit your needs and is perfect for relaxed working while standing, live streaming, watching films/videos/playing games on the sofa or in bed, reading music notes while playing the guitar and during sport.

- Simple floor universal tablet stand with telescopic support and two-part arm, up to 1.63m high
- Adjustable viewing angle for optimal viewing position
- Variable clamps suitable for tablets of different sizes from approx. 4.7" to 12.9", holder width approx. 128-224mm
