V750 GOLD I MULTI

MPZ-7501-AFAG

MAKE IT DIGITAL

FEATURES

Semi-Digital Platform : The digital platform connects directly to the motherboard via included USB 3.0 wire, allowing software based performance monitoring and customization.

80 PLUS Gold Certified : This certification guarantees a minimum typical efficiency of 90% under normal operating conditions.

Fully support ATX3.0 : Fully support ATX3.0 design guide with peak power 200% 100us & 300W native 12VHPWR cable.

Smart Thermal Control Mode : Under the premise of PSU functioning and reliability normally. Customize the FAN curve mode through Masterplus+.

Full Modular Cable Management : Full modular cables reduce clutter, increase airflow, and improve overall efficiency and thermal performance.

10 Year Warranty : This unit comes with a standard limited manufacturing warranty of 10 years from the date of purchase.

The V Gold i was created with two main design principles in mind. The first was fundamental high quality PSU design. Cooler Master wanted to deliver a top-tier PSU that would provide all the bells and whistles a modern user might want or need for their high-end system. The second principle was control. As technology advances, digital solutions make it possible to monitor and customize more aspects of PC hardware. This now includes power supplies. With its digital infrastructure, V Gold i allows users to observe and alter performance in real time via Cooler Master's own MasterPlus+ free software.
