Overview

25 Word Product Description

The CORSAIR ONE i300 Compact Gaming PC is a truly unique desktop PC, powered by a 12th Gen Intel® Core™ processor, NVIDIA® GeForce RTX™ graphics, and award-winning CORSAIR components.

Overview

50 Word Product Description

The CORSAIR ONE i300 Compact Gaming PC is a truly unique desktop PC, combining a 12th Gen Intel® Core™ processor, NVIDIA® GeForce RTX™ graphics, and award-winning CORSAIR components in an amazingly small form-factor. Experience bleeding-edge performance and quiet operation thanks to a convection-assisted liquid cooling system, and multi-task with support for four simultaneous 4K HDR displays.

Overview

100 Word Product Description

The CORSAIR ONE i300 Compact Gaming PC is a truly unique desktop PC, combining a 12th Gen Intel® Core™ processor, NVIDIA® GeForce RTX™ graphics, and award-winning CORSAIR components such as VENGEANCE DDR5 memory in an amazingly small form-factor. Experience bleeding-edge performance and quiet operation thanks to a convection-assisted liquid cooling system, and multi-task with support for four simultaneous 4K HDR displays. Two Thunderbolt 4™ ports offer high-bandwidth connections to compatible devices, while an easy-access front I/O panel comes complete with USB and audio connections. CORSAIR iCUE software lets you customize your system's look or monitor its performance using the integrated RGB light pipes. With the peace of mind that comes with a two-year comprehensive warranty, the CORSAIR ONE is the premier choice for PC gaming in an unbelievably compact package.

Etail Bullet Points

1.CPU	Liquid Cooled 12th Gen Intel® Core™ processor
2.Graphics	NVIDIA® GeForce RTX™ graphics
3.Memory	CORSAIR VENGEANCE DDR5 memory
4.Storage	High-speed M.2 NVMe SSD storage
5.Add'l. Marketing	Patented convection-assisted low-noise liquid cooling system

Unique Selling Points

Style 1	
	Power through the most demanding games and applications with ease with the one-of-a-kind CORSAIR ONE, packing the cutting-edge performance of a modern gaming PC into a gorgeous and quiet small-form-factor that takes up less desk space than a laptop.
	Play in confidence for years thanks to reliable, award-winning CORSAIR components.
	A 12th Gen Intel® Core™ processor offers the latest in dynamic CPU architecture so you can game and multitask without compromise.
	An NVIDIA® GeForce RTX™ graphics card delivers incredibly lifelike real-time ray traced graphics and blisteringly high frame rates.
	CORSAIR VENGEANCE DDR5 high-performance memory leverages the latest platform for the unprecedented speeds to handle even the most complex applications.
	A patented convection-assisted liquid cooling system minimizes CPU and graphics card temperatures, achieving faster performance without excessive fan noise.
	High-speed M.2 NVMe SSD storage enables ultra-fast boot speeds and rapid load times.
	Support for up to four 4K HDR displays for multi-tasking, or VR development and cutting-edge applications.
	Two Thunderbolt 4™ ports offer high-bandwidth connections to compatible devices with speeds of up to 40Gbps.
	Put connections for your most used devices within easy reach with a front I/O panel equipped with a USB Type-C port, two USB Type-A ports, and a 3.5mm audio jack.
	Built-in light pipes and powerful CORSAIR iCUE software allow you to personalize your system's look and monitor system performance at a glance.
	Backed by a comprehensive two-year warranty and lifetime 24/7 tech support service from the world-class CORSAIR customer support team.
Style 2	
	Huge Power, Small Size: Power through the most demanding games and applications with ease with the one-of-a-kind CORSAIR ONE, packing the cutting-edge performance of a modern gaming PC into a gorgeous and quiet small-form-factor that takes up less desk space than a laptop.
	Reliable CORSAIR Components: Play in confidence for years thanks to high-quality, award-winning CORSAIR components.
	12th Gen Intel® Core™ CPU: The latest in dynamic CPU architecture so you can game and multitask without compromise.
	NVIDIA® GeForce RTX™ Graphics: Experience incredibly lifelike real-time ray traced graphics and blisteringly high frame rates.
	CORSAIR VENGEANCE DDR5 Memory: CORSAIR high-performance memory leverages the latest platform for the unprecedented speeds to handle even the most complex applications.
	Patented Convection-Assisted Liquid Cooling: The CORSAIR ONE's unique cooling system minimizes CPU and graphics card temperatures, achieving faster performance without excessive fan noise.
	High-Speed M.2 NVMe SSD Storage: Enables ultra-fast boot speeds and rapid load times.
	Multi-Monitor Connections: Support for up to four 4K HDR displays, or VR development and cutting-edge applications.
	Thunderbolt 4™ Ports: Offers a high-bandwidth connection to compatible devices with speeds of up to 40Gbps.
	Easy-Access Front I/O Panel: Put connections for your most used devices within easy reach with a USB Type-C port, two USB Type-A ports, and a 3.5mm audio jack.
