

Industrial fan heater 5000W

Construction fan heater with high-voltage plug

SHX310HEAT2022

Highlights

- **Powerful**
5000 Watt heat output
- **3 power levels**
Ventilation, 2500W, 5000W
- **Thermostat**
infinitely variable
- **Robust**
Metal housing
- **Safe**
Overheating protection

Industrial fan heater 5000 watts

The industrial fan heater with 5000 watts of power is the perfect solution for quickly and effectively heating large work areas, workshops, halls and storage rooms. The stainless steel heating element provides long-lasting and even heat development.

With 3 adjustable power levels (fan, 2500 watts and 5000 watts), you can adjust the heat output as required and reach the desired temperature quickly. The adjustable thermostat allows you to set the room temperature precisely, ensuring constant heat development.

The integrated overheating protection with automatic reset offers additional safety and protects the fan heater from damage. The compact metal housing and carrying handle make the fan heater robust and easy to transport.

Industrial fan heater 5000W

Construction fan heater with high-voltage plug

SHX310HEAT2022

Scope of delivery

- Industrial fan heater
- Operating instructions

Warranty period

- 2 years

Specifications:

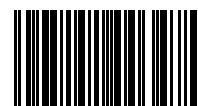

- Max. Power: 5000W
- Voltage: 400V 3N~ 50-60Hz
- Stainless steel heating element
- 3 power levels: Fan / 2500W / 5000W
- Adjustable thermostat
- Overheating protection with automatic reset
- Carrying handle
- Material: Painted metal + plastic

Dimensions:

- Product (W×H×D): 250×410×250 mm
- Packaging (W×H×D): 290×450×290 mm
- Net/gross weight: 5.9 kg / 6.6 kg
