#### Elegant Design

The Mugen 5 Black RGB Edition features a sleek and stylish design alternative to the original, award-winning model. The elegant black anodized aluminum top plate is embellished with an eye-catching diamond cut logo. To keep the tone of the overall design, the Kaze Flex RGB-fan was outfitted with black rubber shock absorbers.

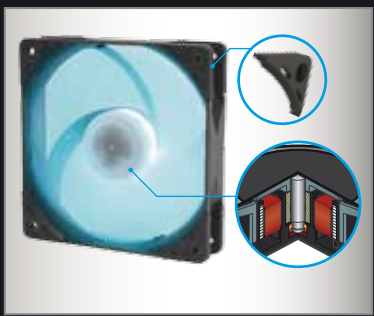

#### Asymmetrical Cooling Structure

Thanks to its slanted heatpipes, the radiator of the Mugen 5 Black RGB-Edition is not centered above the baseplate but slightly offset. This asymmetrical design allows unrestricted use of all memory slots. With a height of only 154,5 mm maximum compatibility with standard PC-cases is ensured. The cooler comes with an improved version of the Hyper Precision Mounting System III. A pre-assembled mounting bar simplifies the installation process while spring-loaded screws prevent uneven pressure distribution.

#### Kaze Flex 120 RGB PWM Fan

Our in-house designed Kaze Flex 120mm RGB PWM fan with a range of 300 to 1200 RPM is used on the Mugen 5 RGB-Edition. This fan is characterized by a self-contained fluid dynamic bearing (Sealed Precision FDB) and an average lifespan of 120.000 hours. It also offers a stunning visual accent due to the colorful RGB illumination of the translucent fan blades. Shock absorbing rubber pads have a decoupling effect and prevent the transmission of vibrations.
